DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or *.

3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runwy or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.
Note: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

"W" meaning: Weather reports available from Weather Bureau or CAA communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 73/80 oct.
F2: 73/80, 91 oct.
F3: 73/80, 91, 100 oct.
NOTE: If only 91 or 100 octane available, this octane cited, and not coded.

Army and Navy Fuel:
A+: 145 oct.
A : 100 oct.
B : 91 oct.
C : 73/80 oct.
J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the acft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for revenue producing aircraft.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and takeoffs to the N.

NOTES

1. → New or revised data.
2. SCHEDULES AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AFB - U. S. Air Force
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont., Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Military Emergency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required
		4...118.1	International airdrome control towers
F...( )	5-F...( )		Tactical or as required
		5...143.28	General Communications
G...137.70		6...143.64	GCA
	6-G...( )		Tactical or as required
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business"

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT. The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

USAF AND NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at AF installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc, all USAF GCA installations will, until approximately January 1, 1950, maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations, Channel A (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (11-17-49)

CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: (1) Correct page 38, by showing Hamilton (Mt. Hope), Ont. VHF DF also transmitting and receiving on 121.5 mc; hours of operation: Sunday, Monday, Wednesday, Thursday 0730-1530, Tuesday 0730-1530, 1800-2030; Friday and Saturday on 45 minutes notice.

(2) Correct page 26, by showing Pennfield Ridge, N.B. radio range also transmitting and guarding 126.18 mc.

(3) Correct page 8, under Winnipeg, Man., by deleting VHF DF on 140.58 mc and substituting 121.5 mc; operating on 30 minutes notice 0730-1530 through tower or gnd/air sta.

(4) Correct page 24, under Rockcliffe, by deleting VHF DF freq 140.58 mc and substituting 121.5 mc. St. Hubert RCAF, P.Q.-Delete VHF DF freq. 140.58 mc and substitute 121.5 mc.

(5) Correct page 26, by showing Greenwood, N.S. control tower also transmitting and guarding 121.5 mc. Operates continuously during normal working hours, other hours on 1/2 hour notice. Operating agency of VHF DF is RCAF instead of R.C.N. Summerside, P.E.I. Radio range and control tower operates continuously; delete VHF DF freq. 140.58 mc and substitute 121.5 mc. Chatham, N.B.-Control tower operates 0800-1700 daily, other hours on request. VHF DF operates on 121.5 mc, hours of operation: 0800-1700 Monday, Friday, 0800-1200 Sat., other hours on request.

(6) Correct page 22, by showing Stirling, Ont. (Trenton) control tower also transmitting and guarding 121.5 mc. Delete transmitting and guarding freq. 140.58 mc.

(7) Correct page 38, by showing Centralia VHF DF operating 0800-1700 daily. Control tower operates 0800-1700 daily.

CHANGE FOR A.N. 08-15-2: Correct listing under Harrisburg (Olmsted AFB), Pa., by changing magnetic bearing and distance radio broadcasting station to read: 150°, 5.5 mi.

CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: Correct Instrument Approach Procedures listing as follows:

(1) Casper (Wardwell), Wyo.: Change procedure previously published so that it covers "Natrona County", Wyo. (Formerly Casper AFB). Change minimum altitude authorized after passing marker or int.: E-6000' (Parkerton FM-Final). Low cone: 6000'. Distance sta to field: 7.4 miles. Delete control tower listing.

(2) Denver (Stapleton), Colo.: Shuttle: On N crs within 25 miles; or as directed by ATC on S crs Denver between range and Aurora FM or on E crs Denver. Change minimum altitude authorized after passing marker or int to W-10,000' (Superior FM E-bound only).

(3) Klamath Falls,Ore.: Change initial approach to W-9500' (Int S crs MFR). Change ceiling over field: 1800'. Min alt over field: 5885'.

(4) Olathe NAS, Kans.: Missed approach procedure: Turn right (east) and climb to 2100' on S crs within 25 miles.

(5) Rock Springs Mun., Wyo.: Add Min. alt authorized after passing marker or int from E-**ILS OM (Final) 8200'. Add double asterisk to Low Cone. Remarks: **Descent to 8200' to pass over the range station at 8200' may be started after passing the ILS OM, provided position over outer marker is verified by visual and aural signals. If outer marker not received final approach altitude over the range station is 8700'.

(6) Texarkana, Ark.: Change initial approach altitudes: NE-1500' (SW crs Little Rock); S-1700' (Int NW crs Shreveport); W-1800' (Sulphur Springs RBN); N-3800' (Ft.Smith RBN). Complete procedure turn within 10, 15-1400'; 20 miles-1700'; 25 miles-1800'. Missed approach procedure: Climb to 1700' on S crs within 25 miles. Remarks: Ctr 750' MSL radio twr located approx 3 mi SW of range station.

(7) Washington National Airport, D.C.: Concurrently with the commissioning and flight check of the new Washington radio range at lat 38-45-57, long. 77-01-37, following LF radio range procedure will become effective. Upon effective date of this new procedure current procedure for Washington National Airport, Bolling Field and Anacostia NAS will be cancelled. Initial approach alt to NE-1600' (Int W crs Baltimore); SE-1500' (Int S crs Baltimore); SW-1500' (Int N crs RIC); NW-1800' (Int E crs FRR). Min alt authorized after passing marker or int.: SW-1000' (Mt. Vernon FM-Final). Complete procedure turn E side SW crs within 10,15,20 mi.-1500', 25 mi.-NA*. Low cone: 1000'. Mag. bear. and dist.: 002°, 5.2 mi. Missed approach procedure: Climb to 1800' on NW crs, or alternate procedure when directed by ATC, climb to 1600' on NE crs. Remarks: *Danger area adjacent to airway approx. 22 miles S of range. NOTE: This procedure effective upon commissioning of new Washington radio range located at lat 38-45-57, long. 77-01-37.

CORRECTION FOR USAF PILOT'S HANDBOOK SPECIAL JET U.S.: Correct Tinker AFB Chart, by showing Tinker radio range frequency as 293 kc.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

(12-20-49)

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

NAVY AND USAF GCA CHANNELS: See item under Air Force Special Notices, entitled, "USAF and Navy GCA Channels"

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, CAA, Washington 25, D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D.C.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

Note: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

OMNIRANGE USE. The effectiveness of the omnirange(VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on April 1, 1950. Beginning September 1, 1949, the installation of a receiving watch on 126.7 mc, airline enroute frequency, by CAA airway communications stations was started. Effective November 1st, all CAA stations guard 126.7 mc. (12-20-49)

NOTE: Effective November 1, 1949, CAA control towers guard 3117.5 kc only on request. Guard to be established within ten minutes after request received.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA Airway Communications Stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

CAA AIRWAY COMMUNICATIONS STATION DISCONTINUE USE OF 116.1 MC: Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency.

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. After September 1, 1949, military stations and aircraft will use 121.5 mc, the international VHF emergency frequency for their emergency frequency.

NOTE: 140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.

SURFACE WIND BROADCASTS AND TRANSMISSIONS: Effective December 1, 1949, CAA Airway Communications Stations give the direction of their local surface wind to 16 points of the compass magnetic in weather broadcasts and in all other Ground/Air transmissions. Surface winds other than local will continue to be given to 16 points of the compass true which is the way they are transmitted on teletype.

VHF-IFR FLIGHTS: On routes which are implemented with but one type of radio range (either L/MF or VHF), air traffic control is exercised on the basis of the type of facility available and the pilot need not specify the type of facility in his flight plan. On routes which are implemented with both L/MF radio ranges and VHF radio ranges (either VAR or VOR), air traffic control is exercised on the assumption that aircraft are utilizing the L/MF radio ranges and pilots should not use the VHF ranges to conduct flight on these routes in IFR weather unless the ATC clearance so authorizes. Therefore, if a pilot desires to conduct IFR flight on such a route by using VHF ranges over all or a portion of this route, his flight plan should so indicate.

STATION LISTENING WATCH: Frequencies guarded by communications stations and control towers have been incorporated in the ANRA section as a new feature. We request any station finding discrepancies in frequencies cited to advise Civil Aeronautics Administration, W-155, Washington 25, D.C.

NON-COMMISSIONED VHF OMNIRANGES: Because the asterisk previously prefixing on-test or non-commissioned omniranges was not sufficiently noticeable, it has been dropped and replaced by the following phrase in the last two columns of the Air Navigation Radio Aids listing: "NON-COMM", for non-commissioned.

INITIAL RADIO CONTACTS: Pilots of civil itinerant aircraft are requested to identify their aircraft fully on the initial contact with CAA facilities as follows: (make) . . . . (all digits of certificate number) . . . . (letter suffix, if any) e. g..

"BEECHCRAFT ONE FOUR SEVEN TWO FIVE"
"STINSON TWO THREE SIX-YOKE"
"NAVION FIVE ZERO ZERO SEVEN"

After communications have been established, an abbreviated form of identification may be used, if desired, as follows:

"STINSON THREE SIX-Y" (Last three units of registration number only)

✓ DESIGNATION OF ON-REQUEST REPORTING POINTS: Effective immediately the following on-request reporting points are established:

(1) TALLAPOOSA - Intersection of the W course of Campbellton, Ga. LF Radio Range and the S course of Rome, Ga. LF Radio Range.

(2) WALNUT - Intersection of the SE course of Atlanta, Ga. LF Radio Range and the S (visual) course of Atlanta, Ga. VAR Radio Range.

(3) AVONDALE - Intersection of the NE course of Atlanta, Ga. LF Radio Range and the N (visual) course of Atlanta, Ga. VAR Radio Range.

(4) TUCKER - Intersection of the N (visual) course of Atlanta, Ga. VAR Radio Range and the E course of Atlanta, Ga. LF Navy Radio Range.

(5) POTOMAC - Intersection of the SW course of Andrews, Md. Radio Range and the N course of Quantico, Va. Radio Range.

DIRECT ROUTE IFR FLIGHTS: On long distance direct IFR flights which may cross or coincide with civil airways for only a short distance, the flight should be planned so that at least one designated or on-request reporting point will be crossed in each Air Route Traffic Control Flight Advisory Area through which the flight is to be conducted. For detailed information concerning this subject consult page 11 of the Flight Information Manual dated August 1, 1949.

✓ FREQUENCY UTILIZATION PLAN 108-132 MC:

108.1 thru 111.9 mc: [1]AIR NAVIGATION AIDS: Instrument landing localizer with simultaneous radiotelephone channel.
112.1 thru 117.9 mc: AIR NAVIGATION AIDS, airway track guidance (ranges).
118.1 thru 121.3 mc. AIR TRAFFIC CONTROL COMMUNICATIONS, ground to air.
121.5 mc: [2-4]EMERGENCY.
121.7, 121.9 mc: [3]AIRPORT UTILITY, Simplex or Crossband.
122.1, 122.3 mc: PRIVATE AIRCRAFT ENROUTE - Air to Ground.
122.5 thru 122.9 mc: PRIVATE AIRCRAFT TO TOWERS - Air to Ground.
123.1 thru 123.5 mc: FLIGHT TEST AND FLYING SCHOOLS (Shared), Simplex.
123.7 thru 125.5 mc: APPROACH CONTROL - Air to Ground.
125.7 thru 126.5 mc: AIR CARRIER - Aircraft to Towers.
126.7 mc: AIR CARRIER - Aircraft to Airways Stations.
126.9 thru 131.9 mc: AIR CARRIERS ENROUTE, Simplex.
132.1 and higher: GOVERNMENT.

General Note: The above utilization plan when fully implemented contemplates crossband communications except in the case of "Air Carriers Enroute" communications which will be on a simplex basis, and "Airport Utility" communications which may be either crossband or simplex. The target date for full implementation is July 1, 1950. Simplex communications will be permitted during this interim period in those cases where equipment in use will not permit crossband. It is expected that implementation of crossband operation will commence immediately.

[1]The frequencies 111.1 thru 111.9 mc have a secondary use in the U.S. as airway communications channels.

[2]The military will use 140.58 mc in the interim period and will authorize its use by other aeronautical services.

[3]Power and antenna height shall be restricted to the minimum to achieve the required service.

[4]No carrier frequency closer than 150 kc to the emergency frequency in the VHF aeronautical frequency band should be assigned.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct C. & G.S. Radio Facility No. 9, by showing Livingston, Mont. VORW elevation as 4640', bearing: 231°, 6 miles.

(2) Correct Chicago-New York Experimental Omni Chart (Om-1) as follows: Due to the realignment of the Allentown Radio Range E course to a bearing of 299° mag. toward the station, the Allentown enroute radial from the Allentown VOR to the Matawan

VAR shall be identified as Allentown radial 120.

(3) Correct Flight Information Manual, Volume 4, No. 1, dated August 1, 1949, as follows: (a) Page 30, add Arcata, California, Class: CAA, Phone No.: 569.

(b) Page 31, change Lexington, Ky. Weather Bureau Phone No. to: 2-2550.

(c) Page 34, change Galveston, Tex. CAA Phone No. to: 5-7233.

(d) Page 49, under Detailed Procedures for U.S. Flights to and from Mexico, correct Para 1.a. to read as follows:Direct application to the Mexican CAA representative at Brownsville, Texas, or Nogales, Arizona.

(e) Page 138, delete listening watch KBRZ under Bryan, Texas. This station has discontinued operation.

(f) Page 196, under New Orleans, La., New Orleans NAS, change take-off minimums to: 500', 1.0 day; NA at night.

(g) Page 198, under Olathe, Kans., change remarks column to: Turn right (East) and climb to 2100' on S crs.

(h) Page 205, under St. Louis, Mo., change (1) min. initial approach alt. from the N to: 1800' (SW crs Springfield); (2) change alternate minimums to: 800', 2.0 mi, day and night.

(i) Page 210, under Springfield, Ill., Capital Arpt: (1) change initial approach from the NW to: 1800' (W crs Peoria); (2) change alternate minimums to: 800', 2.0 mi., day and night.

(j) Page 210, under Springfield, Ill., Southwest Airport, change initial approach from the NW to: 1800' (W crs Peoria).

(k) Page 219, under Ottumwa, Iowa disregard following amendment: "Add note to remarks column: Regular night minimums apply to all types of aircraft. (Private facility for emergency use only)". (This corrects Airman's Guide, Vol. 4, No. 17).

DANGER AREA DESIGNATIONS: The designation of Amendment No. 19, concerning the Onondaga, N.Y. and the Camp Forest, Tenn. Areas, has been postponed. Therefore, AMENDMENT NO. 19 IS CANCELLED.

The following Danger Area Amendments will be in effect as dated unless otherwise advised:

AMENDMENT NO. 21
(December 20, 1949)

1. The KAMALO, MOLOKAI, Territory of Hawaii, Area is deleted.

2. The SCHOFIELD, OAHU, Territory of Hawaii, Area is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 21-30-00N, long. 158-04-33W; northerly to lat. 21-31-36N, long. 158-04-45W; WSW to lat. 21-31-00N, long. 158-07-45W;SSE to lat. 21-29-11N, long. 158-07-33W; ENE to lat. 21-30-00N, long. 158-04-33W, point of beginning.

AMENDMENT NO. 22
(December 23, 1949)

The CAMP FOREST, TENN. (Chattanooga Chart) Area is added: Description: N boundary: lat 35-23-35; S boundary: lat 35-19-15; E boundary: long. 86-03-25; W boundary: long. 86-11-05. Altitudes: Surface to 20,000'. Time: Daylight hours only. Using Agency: 105th Fighter Squadron, Air National Guard, Nashville, Tenn.

AMENDMENT NO. 23
(December 31, 1949)

The WEST MOLOKAI, Territory of Hawaii, Area formerly carried under "Ilio Point" has been renamed and revised as follows: Description: A circular area with a radius of 3 miles centered at lat 21-09, long. 157-16-45. Altitudes: Surface to 10,000'. Time: Continuous. Using Agency: Army and Navy Units of Hawaii.

AIRPORT MANAGERS - LET'S PLAY BALL: Please post your Airman's Guide in a prominent place readily accessible for cross-country pilots' study.

Our recent Airman's Guide survey indicated that many new fliers had never heard of the Guide, and that many older fliers did not have access to the wealth of information it contains.

Fliers frequently complain to us of the inconvenieniences caused by temporarily closed airports or abandoned airports of which they were not aware. And not too few accidents and damage suits stem from the same reason. Yet, the Guide in virtually all instances stated that the airports in question were closed or abandoned.

Therefore, we request you to make your Guide readily available to cross-country pilots and to encourage fliers to refer to it.

Remember: For a safe, convenient ride,
Read the Airman's Guide.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Old Post Office Bldg., Montgomery, Ala.

ANNISTON ARPT: Ctn, strip extensions in progress. Equip. on fld. (12-14)

BIRMINGHAM ARPT: No navy acft svcg will be avail. from local sunset to 0800 CST.(12-15)
2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23)

GENEVA ARPT: Tall grass on lndg area. Unusable. (11-14)

JASPER-WALKER CO. ARPT: Ctn, const. New NW/SE Strip clsd. Use NNE/SSW and E/W Strips only. (12-7)

LANETT-VALLEY AIRPORT: E/W Strip clsd, freshly graded, soft. (12-7)

★MAXWELL AFB (MONTGOMERY)-TOWER: USAF GCA hrs of oper: cont IFR; 0800-1700 Mon-Fri; 0800-1200 Sat. (12-12). These data rcvd too late for inclusion on GCA page.
FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)

** MOBILE-BATES FLD-TOWER: Dec. 12, MMK on 359 kc, ident. "OB" and OMK on 371 kc, ident. "MO" were placed in oper on test basis only during daylgt hrs. FLD: 40' obst lgtd ILS glide path antenna erected 400' E of NW end of NW/SE Rnwy. (12-14)

MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W of mag. north where severe course indicator roughness is present. (6-30)

ARIZONA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707-1/2 W. Thomas Road, Phoenix, Arizona.

(12-20-49)

ARIZONA DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (9-6) Rnwy 8-26 clsd. (9-29)

FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N - Hwy 66; E - Riordan, Ariz.; S - Sycamore Canyon; W - Garland Prairie.

GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)

PHOENIX: Exten trng on Phoenix Rng on all courses except W. (11-2)

PHOENIX-SKY HARBOR ARPT-TOWER: Soon, CAA ILS will be shut down until approx March 25, 1950. (12-4) FLD: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other lndg areas. Nordo crop dusters rstd to use of dirt mat area. (12-15)

PICACHO PEAK, SITE 6A,6B, PHX-ELP: About Jan 3, 1950, these red code blinkers lctd on Picacho Peak 6 mi NW of Red Rock will be permanently discont. (12-19)

RED ROCK INT FLD: Effective Jan 3, 1950, fld will be discont. (12-6)

TUCSON-RADIO: About Dec. 30, NW course of LF rng will be realigned from 127° to 117°. No change in quads. Upon completion of realignment, Red Rock FM on NW course will be decomm. (12-19) These data rcvd too late for + on ANRA page.

WINSLOW ARPT-TOWER: CAA ILS glide path shut down - unreliable. (12-5)

YUMA COUNTY ARPT: Clsd ngts. Rnwys 8-26 and 3-21 open with ctn advised at intsxns of Rnwy 17-35. Rnwy 17-35 clsd, const. Ctn, holes and hvy equip along rnwy. Bcn inop. (12-14)

ARKANSAS: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Adams Field, P. O. Box 1397, Little Rock, Ark.

FORT SMITH-RADIO: VHF omnirng on 113.1 mc unreliable. (10-15)

FORT SMITH ARPT: Asphalt portion W end E/W Rnwy unsafe for acft of twin-eng size or larger. (11-3) 680' extension on W end E/W Rnwy under const. Equip on fld days.

SEARCY ARPT: Gully 1' deep lctd 300 yds from S end across N/S Strip. (12-15)

TEXARKANA-RADIO: VHF omnirng radials 8 mi out from stn, course roughness and mild bends. (11-16)

WALNUT RIDGE-RADIO: LF rng courses aligned by gnd-check only. (11-3)

CALIFORNIA: SPECIAL NOTICE: The addresses of the CAA District Airport Engineers' are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 406 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.

ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these areas. (8-15)

★ARCATA -RADIO: Dec 19, voice commun on 111.1, 121.5 mc comm at INSAC. These data rcvd too late for inclusion on ANRA page.

BAKERSFIELD-KERN CO. #1 ARPT: 15' bldg 300' N of apch end Rnwy 30 and E of N/S Taxi Strip. Const between apch end Rnwy 25 and E/W Taxi Strip just W of N/S Taxi Strip, mrkd. Use rnwys, taxi strips only. (9-3)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: CAA ILS lclzr and OMK operg on test basis only. Lclzr freq: 109.5 mc, channel X, lctd 150' W of W end E/W rnwy. Ident: "BUR". OMK freq 359 kc, ident: "BU" lctd 4.44 mi. W of W end E/W rnwy. (On back course lclzr). (10-4) FLD: Clsd to all trans P-80 acft except on special projects for modification. (11-15)

CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.

★CAMARILLO-RADIO: Dec 12, 1949 LF rng flgt-checked and comm at lat 34-12-26, long. 119-04-56. Freq: 359 kc, ident: "CAV". Courses: 3 A 93 N 183 A 305 N. Mag. var 16° E. Class: SRAWZ. (12-12) Multiples on all courses.

CAMP PENDLETON OLF (OCEANSIDE): Trans acft clear thru MCAS El Toro. (10-5)

CASTLE AFB (MERCED): Use only Rnwy 12-30, acft parked on lndg mat. (8-31)

**CHOWCHILLA ARPT: New fld. Lat 37-07-00; long. 120-15-00. (8-5)

CONCORD-BUCHANAN ARPT: Equip on fld. (10-21)

COSO JUNCTION ARPT: E/W Strip under const. (10-20)

★CRESCENT CITY-RADIO: Dec 19, transmitting fac on 111.1 mc comm at INSAC. These data rcvd too late for inclusion on ANRA page.

EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-31)

EL CENTRO NAS: Rnwy lgts 8-26 and 12-30 inop. Rnwy lgts 3-21 unreliable. (10-10)

**ESCONDIDO ARPT: Reinstated. Lat 33-07-15, long. 117-06-15. (11-18)

CALIFORNIA: FAIRFIELD-SUISUN AFB-RADIO: USAF rng operg normally; multiples and splits beyond 25 mi. (12-1)

FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop until approx Jan 15, 1950. (12-3)

FRESNO-RADIO: VHF omnirng on 112.9 mc, gnd-checked only. (9-27)

FRESNO AIR TERMINAL-ARPT-TOWER: CAA ILS glide path operg on gnd-check basis only. (12-19)

FULLERTON ARPT: Equip on fld. (10-20)

HAWTHORNE ARPT: Equip on N side Rnwy 9-27. (12-15)

HAYWARD ARPT: Const, equip on fld days. Taxiway lgts discont durg const. (11-17)

HOLLISTER ARPT: All rnwy lgts inop. (11-28)

LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS operg from temp lctn 1700' W of W end of rnwy 25L. Course aligned to center of rnwy 25L and is normal by flgt-check. Lclzr back course not usable. (11-7) FLD: Rnwy 4-22 open for taxying only. Equip 1000' out on apch to Rnwys 7L, 7R. Use paved areas only. Equip W end Rnwy 25R, const rnwy extension. About Dec 21, a high intensity slope line apch lgt lane consisting of 56 lgt units in a double line separating 100 to 400' extending 2850' E of end Rnwy 25L, will be placed in oper on test basis. (12-19)

★MARCH AFB-(RIVERSIDE)-RADIO: USAF VHF/DF is operg normally on freq: 121.5, 139.32 and 138.42 mc. (11-30)

MARCH AFB (RIVERSIDE): Inten inst trng in AT-6 acft days Mon thru Fri. Rnwy 7-25 clsd, parked acft. (9-9)

McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 clsd, parked acft. (8-31)

MOFFETT NAS (MTN. VIEW)-RADIO: Navy VHF/DF unreliable. (11-30)

MOFFETT NAS (MTN VIEW): Fld on positive ctl. (8-15)

MOUNT LAGUNA-RADIO: Effect. Nov 21, INSAC hrs of oper for teletype weather reporting and flgt assistance serv will be reduced to part time status - hrs: 0500 to 2100, daily. H fac to cont in full time opern. (11-4)

OAKLAND ARPT: Rnwy 6-24 rstd to lndg and take-off of lgt acft and taxying by all acft. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft lndg gravel area 27, lnd beyond white line. (10-17)

PASO ROBLES-SHERWOOD ARPT: NW/SE Rnwy ruf at intsxn NE/SW Rnwy. Water standing on NW/SE Rnwy wet weather. Lnd short when using NW/SE Rnwy. (9-3)

**QUINCY-GANSNER ARPT: New fld. Lat 39-56-30, long. 120-56-45. (12-5)

REEDLEY-GREAT WESTERN ARPT. 20' extreme SSE end of lndg strip very ruf. (11-16)

SACRAMENTO-RADIO: Auto rng course monitor device temp decomm. (4-14)

SACRAMENTO ARPT: Equip on fld days. (11-13)

**SACRAMENTO-BRANSTETTER ARPT: Use surfaced strip for lndg when wet. (12-10) These data rcvd too late for inclusion in Directory of Airports.

SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy Lgt acft lnd on blacktop only. (11-2)

SAN DIEGO-GIBBS ARPT: Ctn, equip on fld. Open ditch along both sides all rnwys and taxiways. (11-14)

SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (3-4)

SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6)

SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr unreliable daylgt hrs due to arpt const in vicinity of transmitter. (12-6) FLD: Turf area clsd. (12-6)

VAN NUYS-METROPOLITAN ARPT: Equip along edges N/S Rnwy. Keep to paved areas. (10-31)

VICTORVILLE AFB: Clsd Sat, Sun and holidays. (10-4)

COLORADO: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.

DENVER-STAPLETON ARPT: Rnwy 8L-26R clsd to acft larger than DC-3. (11-9)

LA JUNTA MUN ARPT: Ctc lgts on E/W Rnwy being repaired. (11-9)

LOWRY AFB (DENVER)-RADIO: USAF VHF/DF is inop. (11-14)

PUEBLO: Ordance depot lctd approx 17 mi E at lat 38-16-53, long. 104-18-09 is conducting all types of demolition work 0800-1630 MST daily thru December 31, 1949. (11-29)

PUEBLO ARPT: Equip on fld. (11-9)

TRINIDAD ARPT. Administration Bldg being constd N side of fld. (11-9)

CONNECTICUT: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 2200 U. S. Custom House, Boston 9, Mass.

CONNECTICUT: BRIDGEPORT ARPT: After hvy rains pools of water 3 to 4" deep on Rnwy 6-24. (11-2)

E. HARTFORD-RENTSCHLER ARPT: VFR flgt test opers days all alts in 75 mi radius. (8-9)

HARTFORD-RADIO: VHF omnirng on 114.9 mc shut down - relctn. (6-25)

**MERIDEN ARPT: Correct lat 41-30-30, long. 72-49-45. (12-1)

WILLIMANTIC-WINDHAM ARPT: Const off ends all rnwys. Equip on fld. (12-2)

DELAWARE: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P. O. Box 2031, New Castle County Airport, Wilmington 99, Delaware.

DIST. OF COLUMBIA: WASHINGTON NATIONAL ARPT-SPECIAL NOTICE: All military fighter type and all civil fighter type acft are prohibited from using Washington National Arpt.

NOTE: As a general rule, all acft with prefix "P" or "F" are banned and those with prefix "B" are permitted to use fld. (11-21)

WASHINGTON NATIONAL ARPT: USAF: Use of this arpt by USAF acft prohibited except for: (a) Scheduled MATS tfc. (b) Lndgs and take-offs necessary for overseas flgts using customs and immigration clearance facs of aerial port of embarkation. (c) Flgts transporting VIP and General Officers above grade of Major General. Acft utilizing fld under above rstn shall not exceed 120,000 lbs. gross wt without expressed prior approval of arpt director. Fighter type acft are excluded from use of this fld.

NAVY: Clsd to all Navy acft except the following: (a) Acft carrying civilian VIP and officers ABOVE rank of Major General and Rear Admiral. (b) Regularly scheduled MATS and logistic support wing flgts. (c) Flgts rqrg customs and immigration services. Acft utilized not to exceed 120,000 lbs. gross wt without prior approval arpt director. All Navy acft cleared to this fld taxi to MATS terminal N of Administration Bldg.

COAST GUARD: Clsd to all CG acft except the following: (a) Acft carrying civilian VIP and officers of the rank of Rear Admiral or above. (b) Logistic support flgts with prior approval of arpt director (necessity for such flgts to be cleared with Comdt., CG and to be conducted under VFR conditions only). (c) Detachment acft hangared at WNA. All CG acft cleared to this fld, taxi to CG Hangar #6 S of Administration Bldg.

GENERAL: 2-way rdo rqrd. Stay on paved areas, shoulders soft. Lgtd 168' elevator being erected approx 2 mi S (180°T). Equip on fld. Weather Bureau advised it will be conducting exper observations approx 50' S apch end Rnwy 36 when ceiling 600' or lower and/or visibility 1.5 mi or less. Ceiling balloons will be used during daylgt hrs and sealed beam ceiling lgt durg darkness. Generator lctd approx 500' W Rnwy 18-36 and 400' N of Taxiway 2, bounded by Taxiways 1, 2, and 8 and Rnwy 18-36. 46' boom working in apch lane to Rnwy 36 to the water's edge from 3000' out. U. S. Air Force advises no mil hooded inst flgts will be made within 25 mi radius of DCA National Arpt except that practice runs allowed at Andrews Air Force Base with definite radar ctc only. (12-16)

WASHINGTON-SPECIAL NOTICE: CHANGES IN AIR NAVIGATION FACILITIES-WASHINGTON, D. C. AREA: Certain air navigation facilities in the Washington, D. C. area are now in the process of being relocated and the Area is also being implemented with additional installations. Among the changes and additions are the following:

1. Establishment of the Riverdale, Md. MH (Homing Beacon)
   Commissioned April 27, 1949
2. Establishment of the Springfield, Va. MH (Homing Beacon)
   Commissioned April 27, 1949
3. Decommissioning of the Andrews Field, Md. MRL (Radio Range)
   Decommissioned November 1, 1949
4. Modification and realignment of the Brandywine, Md. SMRL to an SMRA, to be called Andrews, Md. SMRA (Radio Range)
   Commissioned November 3, 1949
5. Establishment of the Manakin, Va. MHW (Homing Beacon)
   To be commissioned soon
6. Establishment of the Tappahannock, Va. MRLW (Radio Range)
   Commissioned November 25, 1949
7. Relocation of the Washington, D. C. SRA (Radio Range)
   Estimated date of commissioning January 10, 1950
8. Decommissioning of Washington, D. C. ILS OMK and commissioning of Washington, D. C. ILS MMK (Compass Locator)
   Estimated date of commissioning January 10, 1950
9. Relocation of Mt. Vernon, Va. FM-MHW (Fan Marker & Homing Beacon)
   Estimated date of commissioning January 10, 1950.

DIST OF COLUMBIA: WASHINGTON-RADIO: USAF National MEW radar transmits and grds on req: 126.18, 137.88, 142.38, 134.1 mc; transmits and grds cont: 137.7, 121.5 mc. (11-25)

WASHINGTON-SPECIAL NOTICE: The CAA regards the Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac Riv.

WENDOVER AFB: All mtn lgts inop. (9-30)

VERMONT: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P.O. Box 29, Augusta State Airport, Augusta, Maine.

VERMONT: BURLINGTON-RADIO: LF rng on 323 kc - gnd-checked only. (10-19) Dec 10, VHF omnirng discont pending relctn. (12-10)
BURLINGTON ARPT: Vermont NG P-47's use NW/SE Rnwy only. 1300' E and W sides N/S Rnwy dangerous, use center. (9-7) Turf lndg area clsd. (12-1)
VIRGINIA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P. O. Box 1616, 625 E. Main St., Richmond, 3, Va.
BLACKSTONE-RADIO: Due to strong local interference, rcvg facs unreliable. (11-15)
BLACKSTONE AAF: Unlgtd wind sock installed near inop tetrahedron. (6-24) E/W Rnwy clsd. Ngt lgtg on N/S Rnwy only. (10-6)
CHINCOTEAGUE NAAS: White bcn opers ngts. Use rnwys, taxi strips only, soft shoulders. Pilotless rdo-ctld acft operg days, Mon thru Fri. Other acft in vcnty, ctn. Red rot. bcn opers when fld clsd. It is also turned on when fld is under positive ctl for opers of rdo-ctld acft, target tows, and similar hazardous opers. (8-18)
DAHLGREN: A Ctld Firing Area has been estab approx 18 mi ESE over the Potomac Riv for use by Dahlgren Naval Proving Grounds. Area is described as follows: Beginning at lat 38-12-20, long. 76-34-40; SW to lat 38-09-00, long. 76-37-00; WNW to lat 38-09-55, long. 76-44-00; NE to lat 38-11-10, long. 76-42-20; NNW to lat 38-13-25, long. 76-42-50; NNW to lat 38-14-40, long. 76-43-25; ESE to point of beginning. Adequate notice will be given in advance of firing activity.
DAHLGREN NAF PROVING GROUNDS: Except in emerg or on req (with 2 hrs notice) fld open only 0730 to 1615 Mon thru Fri. Official flgts must be cleared thru one of the following: NAS: Anacostia, D. C.; Patuxent River, Md.; Norfolk, Va.; Quonset Point, R. I.; Lakehurst, N. J. CGAS: Cape May, N. J. NAF: Inyokern, Calif., Torpedo Stn, Newport, R. I.; Naval Acft Factory, Philadelphia, Pa. MCAS: Cherry Point, N.C.; Quantico, Va. AFB: Eglin, Valpariso, Fla.; Langley, Hampton, Va.; Wright, Dayton, Ohio. Proving Ground: Aberdeen, Md. (5-5)
The importance of avoiding the Dahlgren danger area is emphasized by several near accidents recently during periods of danger area activation. Hereafter very definite steps will be taken to identify any fliers who pass over the area without permission.
EMPORIA ARPT: Bcn inop. (8-8)
FALLS CHURCH ARPT: Equip on fld. (8-15)
FRONT ROYAL-RADIO: LF rng courses aligned by gnd-check only. (11-8)
GALAX ARPT: Equip on fld. Ctn taxying off strips. (8-8)
HOPEWELL ARPT: Lndg Strip 9-27 clsd. Const. (10-18)
LANGLEY AFB (HAMPTON)-RADIO: USAF VHF/DF inop. (11-29) Z mrkr is unreliable. (11-28)
LANGLEY AFB (HAMPTON): Const apch ends of all rnwys. (8-31)
LEXINGTON ARPT: Open to lcl tfc only. Const on rnwy extension. (12-2)
MANAKIN-RADIO: Nov 29, MHW fac placed in oper on test basis. Freq. 341 kc, ident: "MNV". Stn lctn: lat 37-37-13, long. 77-41-21.
MANASSAS ARPT: Framework lctd SE side NE/SW Strip and SW side NNW/SSE Strip. (11-15)
MOUNT VERNON: See special notice under District of Columbia.
NEWPORT NEWS-PATRICK HENRY: Grass areas soft, unsafe. Use only hard surfaces for lndgs, taxying and parking. (10-31)
NORFOLK NAS (CHAMBERS FLD): Avail for lcl daylgt flgt opers only. (8-15)
RICHMOND-BYRD ARPT: Use hard surface areas only. Grass area unsafe for taxying or parking. No fuel avail for trans mil acft. (11-2)
**RICHMOND-CARRINGTON ARPT: Correct lat 37-38-45, long. 77-26-30. (12-5)
ROANOKE: Nov 23 to Dec 26, holidays and special occasions, neon star lctd at lat 37-15-00, long. 79-56-00, approx 100' tip to tip, with red, white, blue or combination of those colors, will be displayed on top of mtn from dusk to midngt. Structure is obst lgtd at all times during ngt. (11-23)
ROANOKE-WOODRUM ARPT: Equip adj all rnwys. (12-15)
**SOUTH BOSTON-TUCK FLD: New fld. Lat 36-42-45, long. 78-51-00. (12-19)
TAPPAHANNOCK-RADIO: About Dec 27, all courses of LF rng will be realigned 3° clockwise as follows: 50 A 140 N 230 A 320 N. (12-14)
WASHINGTON: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P. O. Box 18, Boeing Field, Seattle 8, Washington.
SPECIAL NOTICE: Unmrkd p-lines extending across coves in Puget Sound area and lakes. (10-3)
BELLINGHAM-RADIO: Dec 7, LF rng monitor system comm. (12-7) Spurious signals may be emitted. (4-26) VHF omnirng 294° radial, which lies over Vancouver, B. C., has a usable dist. of 20 mi acct course roughness at the lowest instr alt. of 1500' MSL. (8-6)
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate, must register at CAA Comms Bldg. (2-3)
**BELLINGHAM SEAPLANE BASE: Clsd-not maintd. (12-7)
**BELMONT-BLACKS RANCH ARPT: Correct lat 47-05-15, long. 117-12-00. (12-6)
BOTHELL-KENMORE ARPT: Acft parked 40' from both sides of strip. (10-6)
**COLFAX-WHITEMAN COUNTY MEMORIAL ARPT: New fld. Lat 46-51-15, long. 117-25-00. (11-9)
**COLLEGE PLACE-MARTIN ARPT: Correct lat 46-02-45, long. 118-25-00. (12-5) S side of fld under const, use main rnwy only. Ctn, while taxying. (11-17)
McCHORD AFB (TACOMA)-RADIO: USAF rng is unreliable. (11-18)
METALINE FALLS-SULLIVAN ARPT: Circle fld to stop auto tfc. (1-26)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., NAS Whidbey Island. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (3-4)
**PASCO ARPT: Correct lat 46-16-00, long. 119-07-00. (12-5)
SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, Seattle, approx midway between Lake Union and Lake Washington along ship canal. Balloon is 6' in diameter unmrkd and unlgtd with an inst weighing approx 1-1/2 lbs suspended below and secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (1-31)
★SEATTLE-RADIO: The international place name abbreviation KEVO was cancelled Dec 1, 1949. Concurrently Seattle-Tacoma Arpt was designated the international arpt with Boeing Fld an alternate. The international place name abbreviations, KSEA assigned Seattle-Tacoma Arpt and KBFI Boeing Fld. Messages destined to NOTOF and OFACS Seattle should be addressed "KSEA NOTOF or KSEA OFACS" using appropriate abbreviations for addresses and signatures contained in ICAO Doc 6135 COM/507. (12-15) Auto. rng monitor sys comm on LF rng. (12-19) VHF omnirng shut down Sept 16, 1949 - relctn.
★SEATTLE-RADIO-OVERSEAS FOREIGN AERONAUTICAL COMMUNICATION STATION
Effect from Dec 15, 1949, KCJ/Everett Overseas Radio discont grd on all air/ground and point-to-point frequencies. Concurrently KCJ/Seattle Overseas Radio lctd on Seattle-Tacoma Arpt, Seattle, Wash., established continuous transmitting and rcvg grd on 8280 kc (cw) international distress frequency and circuit 457 voice freq 3082.5 and 5037.5 kc plus 2870 kc and 126.7 mc. Transmitting and rcvg grd estab on req on 1638, 6537 kc (cw) and 9980 kc voice and cw. Effective Dec 16, 1949, radio station "KCJ" inaugurated a meteorological bdcast service on 3380, 8538, and 12824 kc (cw) keyed simul. Bdcasts will start at H plus 45 hourly and contain airway weather rpts from PDX-Portland, Oregon; SEA-Seattle, Wash., (Seattle-Tacoma); EVE-Everett, Wash.; WYI-Whidbey Island, Wash., (Ault Fld); EUG-Eugene, Oregon; EPH-Ephrata, Wash., YJ-Patricia Bay, B.C., XX-Abbotsford, B. C.; VR-Vancouver, B. C.; ANN-Annett Island, Alaska; GST-Gustavus, Alaska; ZT-Porthardy, B. C.; SX-Prince George, B. C.
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. Avoid flagged area E side of strip. Equip on fld. (12-2)
SEATTLE-NAS: Single-eng acft will enter the tfc pat over Kirkland at 1000', at which point lndg instructions will be rqrd from the twr. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-16)
SEATTLE-SEATTLE-TACOMA ARPT: Equip on fld. (10-18)
SPOKANE-FELTS FLD: 1800' ext avail NE end NE/SW Rnwy. (11-8) Open ditch and 4' ridges of dirt extending along SW bndry within 25' of apch end Rnwy 3. Take-off and lndgs will be made on rnwy most nearly aligned with free swinging tetrahedron. When tetrahedron points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (11-8) 816' twr Rdo Stn KHQ lctd 5.0 mi SSW (205°T) at lat 47-36-54, long. 117-22-30 reduced to 430' due to storm. Temp obst lgtd to 300' level only. (11-29)
SPOKANE-GEIGER FLD: Equip on fld. (9-27)
TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Cables and temp foot bridge will stretch across Puget Sound between high banks and supporting twrs. (4-12)
TOLEDO INT FLD: Turf lndg area clsd. Use rnwy only. (11-29)

(12-20-49)

WASHINGTON: WENATCHEE: Unmrkd p-line crosses Columbia Riv 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (5-16)

WHIDBEY ISLAND NAS (AULT FLD): Ctn, remain in center rnwys. Open drainage gutters sides both rnwys. Obst area extreme apch end of Rnwy 12 and taxiways, mrkd. Ctn, const on rnwys and taxiways. (5-27)

WEST VIRGINIA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Kanawha County Court House, Charleston, W. Va.

CHARLESTON-KANAWHA CO. ARPT: Ctn, equip on fld, SE side Rnwy 5-23, and crossing Rnwy 15-33 days. Obstn mrkd, day, ngt. Ramp SW Side clsd, const, mrkd. (11-14)

PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (10-21)

RAVENSWOOD ARPT: NW/SE Strip clsd. (10-24)

S. PARKERSBURG-GUINN'S ARPT: E/W Strip clsd. (10-24)

WHEELING -OHIO-CO. ARPT: Black snow flags erected near each rnwy lgt. (11-21)

WISCONSIN: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 638 State St., Madison 3, Wis.

GLIDDEN: Const new arpt 1 mi SE at lat 46-07-15, long. 90-34-30. Unusable. (10-12)

GRANTSBURG-RADIO: Temporarily, scheduled bdcasts made on the hr and 30 min past the hr. Teletype service will be inaugurated at a later date. (8-2)

MADISON ARPT: Flood lgts Rnwys 8, 13, and 18 inop. Numerous cable trenches along all rnwys and extreme ends of NE/SW and NW/SE Rnwys. Equip on fld days. Sod unsafe. (11-30) Due to non-visibility from twr, twr unable to ctl tfc on SE ramp. (12-19)

★MILWAUKEE-GENERAL MITCHELL FLD-TOWER: Oct 28, 1949 CAA ILS OMK was placed in oper at lat 42-52-12, long. 87-54-27. Freq: 219 kc. Ident: "MK". (12-15) Not flgt-checked. FLD: Rnwy 9-27 not to be used at any time with wind under 8 mph except in emerg or upon demand by pilot for definite reason, or take-off in inst weather to expedite tfc. Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. (11-30)

OSHKOSH-WINNEBAGO CO. ARPT: During winter months, use N/S and E/W Rnwys only. (12-14)

**PLAINFIELD ARPT: Correct lat. 44-12-45, long 89-29-45. (12-5)

**TOMAHAWK-FOREST CITY ARPT: New fld. Lat 45-29-30, long. 89-36-45. (10-18)

WAUTOMA ARPT: Apch clearing not completed. (11-30)

WYOMING: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.

AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (11-9)

CASPER-RADIO: VHF omnirng courses between 10° and 35° from stn not flyable at minimum instrument alt beyond 35 mi. (10-11)

CASPER-NATRONA CO. ARPT: Rnwy lgts on Rnwys 2, 5 inop. (9-20)

CHEYENNE-RADIO: Effect. Dec 30, 1949, Meadows FM on N course will be permanently decomm. (12-9)

LARAMIE-RADIO: LF rng course monitor. device decomm. (10-18)

PINE BLUFFS ARPT, SITE 44, SLC-OMA: Clsd ngts, high vegetation. Use strips between green apch lgts on E/W and N/S apchs days only. Red flash. hazard lgts and red flags displayed on twr. (11-1)

RAWLINS ARPT: Use new ENE/WSW and N/S Strips only. (11-9)

SHERIDAN CO. ARPT: N/S Rnwys clsd to acft heavier than DC-3. (11-9)

ALERT PILOTS ARE LIVE PILOTS

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airports closed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

AIM

SPECIAL NOTICES

WHAT DOES THAT "+" ON AN AIRPORT MEAN? See last two pages for details of a closed airport or runway marker.

EVER BEEN LOST (TEMPORARILY, THAT IS)? Personnel at CAA communications stations are trained to assist pilots in establishing position by:

(a) Visual reference to terrain features.
(b) VHF omnirange indications (triangulation).
(c) Low frequency radio range orientation.

Call any CAA Radio (Airway Communications Station) for enroute flight service.

G C A A V A I L A B L E: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = Glide Path. L7=H1-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's, < OMK's are at the same locations as the middle and outer markers unless otherwise specified. → New or revised data. + =additional data will be found in Notices To Airmen section (1-3-50)

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: See "VOR Use' page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicates by parenthetical (2). Category III= Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180' indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . Control Tower, CAA
CA . . . Control Tower, Air Force
CI . . . . Control Tower (City, County, Private, etc.)
CN . . . . Control Tower, Navy
D . . . . Distantly controlled
FM . . . VHF fan marker (100 watts)

GCA . . . Ground Controlled approach system
H . . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . . Instrument Landing System (voice on localizer channel)
IM . . . . VHF boundary marker
L . . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range.
MH . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . Range (loop radiators), power less than 50 watts
MM . . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . . Point-to-Point radio
RA . . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . . Simultaneous (range signals and voice) type of transmitter.
T . . . . Teletype
TX . . . Principal teletype
V . . . . Additional VHF voice feature on other than range frequency.
VAR . . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

FREQUENCY LEGEND

= Guards same VHF frequencies station transmits
(1) = 3105, 4495 kc Guarded
(2) = 3105, 4495, 3117.5(10 min prior request) kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105, 4495, 3117.5 kc; 122.1, 126.7, 140.58 mc. This group of frequencies is group generally guarded by INSACS.
NOTE: (3)-3117.5 kc = guards every frequency in (3) except 3117.5 kc.
(3) ,6210 kc = guards every frequency in group (3) plus 6210 kc.

1. - The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. - Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all C.A.A. airway communication stations on April 1, 1950.
3. - Range courses are magnetic in -bearings
✓ = New facilities or name changes, see page XDX
+ = additional data will be found in Notices To Airmen section.

DIRECTORY OF AIRPORTS
LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or *.

3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	- U.S. Air Force	I	- Intermediate	N	- Navy
C	- Commercial	M	- Municipal	NG	- Nat'l Guard
CG	- Coast Guard	MG	- Misc. Govt.	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY
FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runwy or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.
Note: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:	Army and Navy Fuel:
F1: 73/80 oct.	A+: 145 oct.
F2: 73/80, 91 oct.	A : 100 oct.
F3: 73/80, 91, 100 oct.	B : 91 oct.
NOTE: If only 91 or 100 octane available, this octane cited, and not coded.	C : 73/80 oct.
	J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the acft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for revenue producing aircraft.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

NOTES

1. ➸ New or revised data.
2. SCHEDULES AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AFB - U. S. Air Force
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 06-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Military Emergency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required
		4...118.1	International airdrome control towers
F...( )	5-F...( )		Tactical or as required
		5...143.28	General Communications
G...137.70		6...143.64	GCA
	6-G...( )		Tactical or as required
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

USAF AND NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at AF installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc, all USAF GCA installations will, until approximately January 1, 1950, maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations, Channel A (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (11-17-49)

✓ CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: (1) Correct page 24, by showing Rockcliffe VHF/DF operating 0830-1700 Mon thru Fri.; 0830-1200 Sat.; other hours on request.

(2) Correct page 26, by showing Summerside Gnd/Air Sta transmitting on 6365,4208, 4890,4180 kc; receiving on 6365,4208,4890,4180 kc on request. Hours of operation: 0830-1700 and on request.

(3) Correct page 24, by showing Rockcliffe RCAF gnd/air sta operating 0800-2300 Mon thru Sat., on request Sundays and holidays.

(4) Correct page 26, by showing Dartmouth, N.S., Halifax gnd/air sta CQQ also operating on 4290 kc. Summerside, P.E.I. control twr also transmits and guards 121.5 mc; VHF/DF also operates on 137.7 mc.

(5) Correct page 38, by showing Hamilton, Ont. (Mt. Hope) control tower operating from 0830-1630 Sunday thru Thursday only. VHF/DF operates from 0830-1630 Sunday thru Thursday only; other times on 45 minute request.

(6) Correct page 26, by showing Chatham, N.B. VHF/DF also transmitting and guarding 137.70 mc; GCA facility transmits on 126.18, 137.70, 121.5, 134.1, guards 121.5,126.18,137.70 mc., receives on 3105,6210,4400 kc, 134.10, 139.90,140.58 mc, hours of operation: 0800-1700 Mon thru Fri., and on request.

NOTE: See page 60 for additional corrections and amendments.

CHANGES FOR A.N. 08-15-2: Correct page 3, by showing Mobile (Brookley), Ala. radio station's magnetic bearing and distances of following stations as follows: WABB-158°,9.5 mi.; WALA-228°,4.7 mi; WKAB-163°,4.5 mi.; WKRG-178°,5.5 mi.

✓ CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: Correct Instrument Approach Procedures listing as follows:

(1) Tyndall AFB, Fla.: Change initial approach altitude to NW-1400' (Int E crs VPS).

(2) Page 168, Whidbey Island NAS, Wash.: Change procedure turn to: W side of SE crs.

(3) Page 28, Chanute AFB, Ill.: Change dist sta to field to: 3.4 mi.

(4) Page 56, Enterprise, Utah: Dist. sta to field: 3.3 miles.

(5) Omaha Mun., Nebr.: Change mag. bearing and dist. sta to field: 144°, 5.1 mi. Remarks: Ctn: Stack 1192' MSL lctd 4 mi NW of arpt, 1 mi W of SE crs. Bluff 1260' MSL lctd 1-1/2 mi NE of arpt.

(6) Change magnetic bearing and/or distance station to field as follows:

(a) Pages 10 and 11, Amarillo, Tex. (Procedures 1 and 2); 84°

(b) Page 15, Bakersfield (Kern Co. No.), Calif.: 150°.

(c) Page 19, Billings, Mont.: 256°

(d) Page 20, Bismarck, N.D.: 246°, 2.1 miles.

(e) Page 21, Boise (Air Terminal), Idaho: 116°.

(f) Page 25, Burley, Idaho: 198°, 2.6 miles.

(g) Page 26, Burlington, Vt.: 2.7 miles.

(h) Page 27, Natrona Co. (Casper), Wyo.: 256°, 7.6 miles.

(i) Page 28, Chanute AFB, Ill.: 4.4 miles.

(j) Page 44, Delta, Utah: 25°, 3.5 miles.

(k) Page 48, Douglas, Ariz.: 3.5 miles.

(l) Page 52, El Centro, Calif.: 3.8 miles.

(m) Page 56, Enterprise, Utah: 250°, 3.0 miles.

(n) Page 78, Jackson (Hawkins), Miss.: 193°, 2.1 miles.

(o) Page 86, Langley AFB, Va.: 109°, 3.0 miles.

(p) Page 91, Little Rock, Ark.: 315°.

(q) Page 94, Lynchburg (Preston-Glenn), Va.: 157°.

(r) Page 126, Portland, Ore.: 169°, 3.2 miles.

(s) Page 130, Randolph AFB, Tex.: 325°, 2.2 miles.

(t) Page 160, Tulsa, Okla.: 220°.

(u) Page 161, Utica, N.Y. (Griffiss AFB): 2.9 miles.

(v) Page 170, Wichita, Kans.: 140°, 0.8 miles.

(w) Page 171, Williamsport, Pa.: 285°, 6.9 miles.

(7) Corpus Christi NAS, Tex.: Change ceiling over airport: 400'; Min. Alt. over arpt: 419'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft. (1-3-50)

NAVY AND USAF GCA CHANNELS: See item under Air Force Special Notices, entitled, "USAF and Navy GCA Channels".

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, CAA, Washington 25, D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D.C.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

Note: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

OMNIRANGE USE: The effectiveness of the omnirange(VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on April 1, 1950. Beginning September 1, 1949, the installation of a receiving watch on 126.7 mc, airline enroute frequency, by CAA airway communications stations was started. Effective November 1st, all CAA stations guard 126.7 mc.

NOTE: Effective November 1, 1949, CAA control towers guard 3117.5 kc only on request. Guard to be established within ten minutes after request received.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA Airway Communications Stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

CAA AIRWAY COMMUNICATIONS STATION DISCONTINUE USE OF 116.1 MC: Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. After September 1, 1949, military stations and aircraft will use 121.5 mc, the international VHF emergency frequency for their emergency frequency.

NOTE: 140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.

SURFACE WIND BROADCASTS AND TRANSMISSIONS: Effective December 1, 1949, CAA Airway Communications Stations give the direction of their local surface wind to 16 points of the compass magnetic in weather broadcasts and in all other Ground/Air transmissions. Surface winds other than local will continue to be given to 16 points of the compass true which is the way they are transmitted on teletype.

VHF-IFR FLIGHTS: On routes which are implemented with but one type of radio range (either L/MF or VHF), air traffic control is exercised on the basis of the type of facility available and the pilot need not specify the type of facility in his flight plan. On routes which are implemented with both L/MF radio ranges and VHF radio ranges (either VAR or VOR), air traffic control is exercised on the assumption that aircraft are utilizing the L/MF radio ranges and pilots should not use the VHF ranges to conduct flight on these routes in IFR weather unless the ATC clearance so authorizes. Therefore, if a pilot desires to conduct IFR flight on such a route by using VHF ranges over all or a portion of this route, his flight plan should so indicate.

STATION LISTENING WATCH: Frequencies guarded by communications stations and control towers have been incorporated in the ANRA section as a new feature. We request any station finding discrepancies in frequencies cited to advise Civil Aeronautics Administration, W-155, Washington 25, D.C.

NON-COMMISSIONED VHF OMNIRANGES: Because the asterisk previously prefixing on-test or non-commissioned omniranges was not sufficiently noticeable, it has been dropped and replaced by the following phrase in the last two columns of the Air Navigation Radio Aids listing: "NON-COMM", for non-commissioned.

INITIAL RADIO CONTACTS: Pilots of civil itinerant aircraft are requested to identify their aircraft fully on the initial contact with CAA facilities as follows: (make) . . . . (all digits of certificate number) . . . (letter suffix, if any) e. g.,

"BEECHCRAFT ONE FOUR SEVEN TWO FIVE"
"STINSON TWO THREE SIX-YOKE"
"NAVION FIVE ZERO ZERO SEVEN"

After communications have been established, an abbreviated form of identification may be used, if desired, as follows:

"STINSON THREE SIX-YOKE" (Last 3 units of registration number only).

DIRECT ROUTE IFR FLIGHTS: On long distance direct IFR flights which may cross or coincide with civil airways for only a short distance, the flight should be planned so that at least one designated or on-request reporting point will be crossed in each Air Route Traffic Control Flight Advisory Area through which the flight is to be conducted. For detailed information concerning this subject consult page 11 of the Flight Information Manual dated August 1, 1949.

✓ FREQUENCY UTILIZATION PLAN 108-132 MC:

108.1 thru 111.9 mc: [1]AIR NAVIGATION AIDS: Instrument landing localizer with simultaneous radiotelephone channel.
112.1 thru 117.9 mc: AIR NAVIGATION AIDS, airway track guidance (ranges).
118.1 thru 121.3 mc: AIR TRAFFIC CONTROL COMMUNICATIONS, ground to air
121.5 mc: [2-4]EMERGENCY.
121.7, 121.9 mc: [3]AIRPORT UTILITY. Simplex or Crossband.
122.1, 122.3 mc: PRIVATE AIRCRAFT ENROUTE - Air to Ground.
122.5 thru 122.9 mc: PRIVATE AIRCRAFT TO TOWERS - Air to Ground.
123.1 thru 123.5 mc: FLIGHT TEST AND FLYING SCHOOLS (Shared), Simplex.
123.7 thru 125.5 mc: APPROACH CONTROL - Air to Ground.
125.7 thru 126.5 mc: AIR CARRIER - Aircraft to Towers.
126.7 mc: AIR CARRIER - Aircraft to Airways Stations.
126.9 thru 131.9 mc: AIR CARRIERS ENROUTE, Simplex.
132.1 and higher: GOVERNMENT.

General Note: The above utilization plan when fully implemented contemplates crossband communications except in the case of "Air Carriers Enroute" communications which will be on a simplex basis, and "Airport Utility" communications which may be either crossband or simplex. The target date for full implementation is July 1, 1950. Simplex communications will be permitted during this interim period in those cases where equipment in use will not permit crossband. It is expected that implementation of crossband operation will commence immediately.

[1]The frequencies 111.1 thru 111.9 mc have a secondary use in the U.S. as airway communications channels.
[2]The military will use 140.58 mc in the interim period and will authorize its use by other aeronautical services.
[3]Power and antenna height shall be restricted to the minimum to achieve the required service.
[4]No carrier frequency closer than 150 kc to the emergency frequency in the VHF aeronautical frequency band should be assigned.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. Instrument Approach Chart-Range, AL 553, dated September 28, 1949 by showing Geiger Tower, Spokane, Wash., radio range course designations listed under Initial Approach data as follows: N, E, S, W.

✓ DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS: Effective 0001 EST, January 20, 1950, Civil Airways, Control Areas, Control Zones, and Reporting Points are amended in whole or in part as follows.

CIVIL AIRWAYS: (1) Green Airway No. 5 (Los Angeles, Calif., to Boston, Mass.) Change "Brandywine, Md." to read "Andrews, Md." and "Jack's Creek, Tenn.," to read "Jackson, Tenn."

(2) Amber Airway No. 7 (Key West, Fla., to Caribou, Me.). . . Richmond, Va. range station; the intersection of the N course of Richmond, Va. range and the SW course of Washington, D.C. range; Washington, D.C. range stn; the intersection of the NE course of Washington, D.C. range and the W course of Philadelphia, Pa. range, excluding that portion more than 3 miles east of the SW course of Washington, D.C. range between Doncaster, Md. FM and the intersection of the SW course of Washington, D.C. range and the NW course of Tappahannock, Va. range; Philadelphia, Pa. range station.

(3) Red Airway No. 19 (Grand Rapids, Mich., to Norfolk, Va.). From Grand Rapids, Mich. range stn via the intxn of the SW crs of Grand Rapids, Mich. rng and the N crs of Goshen, Ind. rng to Goshen, Ind. rng stn. From the intxn of the E crs of Goshen, Ind. rng and the NW crs of Ft. Wayne, Ind. rng via Ft. Wayne, Ind. rng stn to Dayton, Ohio rng stn. From the intxn of the W crs of Pittsburgh, Pa. rng and the NW crs of Morgantown, W.Va. rng via the Morgantown, W.Va. rng stn to the intxn of the SE crs of Morgantown, W.Va. rng and the W crs of Front Royal, Va. rng From the intxn of the N crs of Richmond, Va. rng and the NW crs of Tappahannock, Va. rng via Tappahannock, Va. rng stn to the intxn of the SE crs of Tappahannock, Va. rng and the NW crs of Langley, Va rng, excluding those portions more than 2 miles either side of the NW crs of Tappahannock, Va. rng and more than 3 miles on the E side of the N crs of Langley, Va. rng.

(4) Red Airway No. 20 (Lansing, Mich., to Washington, D.C.) Delete the phrase: "excluding that portion which lies more than 3 miles N of the SE crs of Washington, D.C. rng between the intxn of the SE crs of Washington, D.C. rng and the S crs of Baltimore, Md. rng and and Red Airway No. 77".

(1-3-50)

(5) Red Airway No. 29 (Rochester, N.Y., to Baltimore, Md.) Change "Brandywine, Md." to read "Andrews, Md.".

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Change in Weather Service
Newport News, Va. (Patrick Henry Arpt)	37°08', 76°30'	Hourly reports to be available soon
Divide, Colo.		SW reports discontinued.

NOTE: Van Nuys, Calif., SW in lieu of hourly reports to be available soon.

ADDITIONAL A.N. 08-15-1 CORRECTIONS

(1) Correct page 26, by showing Chatham, N.B. GCA fac. transmits and guards 116.1, 139.14 mc in addition to frequencies already published; also guards 200-500 kc and 1.5 mcs.

(2) Correct page 24, by showing Montreal, Que. control tower also operating on 128.7 mc.

(3) Correct page 22, by showing Stirling, Ont. (Trenton), Twr no longer transmitting and guarding 140.58 mc.

(4) Correct page 24, by showing Montreal, Que. (Dorval): Gnd/air stn operates from 0800-2300 Mon thru Fri.; 0800-1300 Sat.; other hrs on request. Arnprior, Ont., MHW fac has been commissioned, location: 45-25N, 76-22W, ident.: CGK, freq.: 353 kc, operating agency: RCAF.

(5) Correct page 26, by deleting control twr freq. 140.58 mc under Chatham. Greenwood, N.S. control twr also guards 121.5 mc. Dartmouth, N.S. Halifax Gnd/Air Stn CQQ operates 0900-1700 Mon thru Fri., 0900-1230 Sat., and on request.

AIRPORT MANAGERS - LET'S PLAY BALL: Please post your Airman's Guide in a prominent place readily accessible for cross-country pilots' study.

Our recent Airman's Guide survey indicated that many new fliers had never heard of the Guide, and that many older fliers did not have access to the wealth of information it contains.

Fliers frequently complain to us of the inconvenieniences caused by temporarily closed airports or abandoned airports of which they were not aware. And not too few accidents and damage suits stem from the same reason. Yet, the Guide in virtually all instances stated that the airports in question were closed or abandoned.

Therefore, we request you to make your Guide readily available to cross-country pilots and to encourage fliers to refer to it.

Remember: For a safe, convenient ride,
Read the Airman's Guide.

DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective on January 15, 1950, unless otherwise advised:

AMENDMENT NO. 19

NOTE: Inasmuch as the designation of the original Amendment No. 19 has been postponed, in lieu thereof the following substitution will be inserted:

1. OROGRANDE, N. MEX. (Roswell Chart) - area is added: Description: Beginning at lat 32-36, long 106-00; due S to lat 32-27-40; W to lat 32-28, long 106-02; SW along the So. Pac. RR to the town of Orogrande at lat 32-22, long 106-05; SW along S.P. RR to lat 32-06-15, long 106-15-15; 2 mi W to lat 32-06-30, long 106-17-15; NE on a line 2 mi W and parallel to the S.P. RR to lat 32-23, long 106-07; NNE to lat 32-25, long 106-06; due N to lat 32-36; due E to point of beginning. Altitudes: From 4000' above ground to unlimited. Time: Continuous. Using Agency: Headquarters, Anti-aircraft Artillery and Guided Missile Center, Fort Bliss, Texas.

2. CORPUS CHRISTI, TEX. - Area (2) is DELETED. (A circular area with a 4 mi radius centered at lat 27-38-45, long 97-32-50)

ALL AMERICAN AIR MANEUVERS - Opa Locka Airport, Miami, Fla., January 13-15, inclusive: Pilots are cautioned to be alert for congested traffic. In the interest of safety, it is suggested that pilots enroute, file flight plans specifying AIRPORT of intended landing at destination

Temporary Airport Traffic Control Towers will be in operation at Opa Locka and Sunny South Airports.

Havana tour will depart from Sunny South on morning of January 16. Entry blanks may be obtained from Miami All American Air Maneuvers.

CAUTION: Miami Aviation Center has been abandoned and no longer exists as an airport.

Aircraft utilizing Miami International Airport must have functioning aircraft two-way radio unless authorized by Chief Airport Traffic Controller.

For further details see page no. 63

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once. (1-3-50)

ALABAMA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Old Post Office Bldg., Montgomery, Ala.
ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (12-14)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No navy acft svcg avail from lcl sunset to 0800 CST. (12-15)
GENEVA ARPT: Tall grass on lndg area. Unusable. (11-14)
JASPER-WALKER CO. ARPT: Ctn, const. New NW/SE Strip clsd. Use NNE/SSW and E/W Strips only. (12-7)
LANETT-VALLEY ARPT: E/W Strip clsd, freshly graded, soft. (12-7)
★MAXWELL AFB (MONTGOMERY)-RADIO: USAF GCA also oper on VHF 142.02 mc. (12-20) These data rcvd too late for inclusion on ANRA page.
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)
MOBILE-BATES FLD-TOWER: Dec 12, MMK on 359 kc, ident "OB" and OMK on 371 kc, ident "MO" were placed in oper on test basis only durg daylgt hrs.
MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W of mag. north where severe course indicator roughness is present. (6-30)
ARIZONA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707 1/2 W. Thomas Road, Phoenix, Arizona.
DAVIS-MONTHAN AFB (TUCSON): E lld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (12-29)
FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N - Hwy 66; E - Riordan, Ariz.; S - Sycamore Canyon; W - Garland Prairie.
GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)
PHOENIX : Exten trng on Phoenix Rng on all courses except W. (11-2)
PHOENIX-SKY HARBOR ARPT: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other lndg areas. Nordo crop dusters rstd to use of dirt mat area. (12-15)
PICACHO PEAK, SITE 6A, 6B, 6C, PHX-ELP: Soon, these red code blinkers lctd on Picacho Peak 6 mi NW of Red Rock will be permanently discont. (12-21)
RED ROCK INT FLD: Soon fld will be discont. (12-16)
TUCSON-RADIO: About Dec 30, 1949, NW course of LF rng will be realigned from 127° to 117°. No change in quads. Upon completion of realignment, Red Rock FM on NW course will be decomm. (12-19)
WINSLOW ARPT-TOWER: CAA ILS glide path shut down - unreliable. (12-5)
YUMA COUNTY ARPT: Clsd ngts. Rnwys 8-26 and 3-21 open with ctn advised at intsxns of Rnwy 17-35. Rnwy 17-35 clsd, const. Ctn, holes and hvy equip along rnwy. Bcn inop. (12-14)
ARKANSAS: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Adams Field, P. O. Box 1397, Little Rock, Ark.
FORT SMITH - RADIO: VHF omrirng on 113.1 mc unreliable. (10-15)
FORT SMITH ARPT: Asphalt portion W end E/W Rnwy unsafe for acft of twin-eng size or larger. (11-3) 680' extension on W end E/W Rnwy under const. Equip on fld days. (12-1)
SEARCY ARPT: Gully 1' deep lctd 300 yds from S end across N/S Strip. (12-15)
TEXARKANA-RADIO: VHF omnirng radials 8 mi out from stn, course roughness and mild bends. (11-16)
WALNUT RIDGE-RADIO: LF rng courses aligned by gnd-check only. (11-3) VHF omnirng operg on 115.7 mc normally from gnd observation only. Ctn advised until flgt-checked. (12-20)
CALIFORNIA: SPECIAL NOTICE: The address of the CAA District Airport Engineers are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 206 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.
ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these areas. (8-15)

BRIDGEPORT ARPT: After hvy rains pools of water 3 to 4" deep on Rnwy 6-24. (11-2)
**EAST HAMPTON-POCOTOPAUG SEAPLANE BASE: Closed winter months. (12-30)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test opers days all alts in 75 mi radius. (8-9)
HARTFORD-RADIO: VHF omnirng on 114.9 mc shutdown - relctn. (6-25)
**HARTFORD SEAPLANE BASE: Closed winter months. (12-30)
WILLIMANTIC-WINDHAM ARPT: Const off ends all rnwys. Equip on fld. (12-2)
DELAWARE: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P. O. Box 2031, New Castle County Airport, Wilmington 99, Delaware.
DIST. OF COLUMBIA: WASHINGTON NATIONAL ARPT-SPECIAL NOTICE: All military fighter type and all civil fighter type acft are prohibited from using Washington National Arpt.
NOTE: As a general rule, all acft with prefix "P" or "F" are banned and those with prefix "B" are permitted to use fld. (11-21)
WASHINGTON NATIONAL ARPT: USAF: Use of this arpt by USAF acft prohibited except for: (a) Scheduled MATS tfc. (b) Lndgs and take-offs necessary for overseas flgts using customs and immigration clearance facs of aerial port of embarkation. (c) Flgts transporting VIP and General Officers above grade of Major General. Acft utilizing fld under above rstn shall not exceed 120,000 lbs. gross wt without expressed prior approval of arpt director. Fighter type acft are excluded from use of this fld.
NAVY: Clsd to all Navy acft except the following: (a) Acft carrying civilian VIP and officers ABOVE rank of Major General and Rear Admiral. (b) Regularly scheduled MATS and logistic support wing flgts. (c) Flgts rqrg customs and immigration services. Acft utilized not to exceed 120,000 lbs. gross wt without prior approval arpt director. All Navy acft cleared to this fld taxi to MATS terminal N of Administration Bldg.
COAST GUARD: Clsd to all CG acft except the following: (a) Acft carrying civilian VIP and officers of the rank of Rear Admiral or above. (b) Logistic support flgts with prior approval of arpt director (necessity for such flgts to be cleared with Comdt., CG and to be conducted under VFR conditions only). (c) Detachment acft hangared at WNA. All CG acft cleared to this fld, taxi to CG Hangar #6 S of Administration Bldg.
GENERAL: 2-way rdo rqrd. Stay on paved areas, shoulders soft. Lgtd 168' elevator being erected approx 2 mi S (180°T). Equip on fld. Weather Bureau advised it will be conducting exper observations approx 50' S apch end Rnwy 36 when ceiling 600' or lower and/or visibility 1.5 mi or less. Ceiling balloons will be used during daylgt hrs and sealed beam ceiling lgt durg darkness. Generator lctd approx 500' W Rnwy 18-36 and 400' N of Taxiway 2, bounded by Taxiways 1, 2, and 8 and Rnwy 18-36. 46' boom working in apch lane to Rnwy 36 to the water's edge from 3000' out. U.S. Air Force advises no

DIST. OF COLUMBIA: mil hooded inst flgts will be made within 25 mi radius of DCA National Arpt except that practice runs allowed at Andrews Air Force Base with definite radar ctc only. (12-29)
WASHINGTON-SPECIAL NOTICE: CHANGES IN AIR NAVIGATION FACILITIES-WASHINGTON, D. C. AREA: Certain air navigation facilities in the Washington, D. C. area are now in the process of being relocated and the Area is also being implemented with additional installations. Among the changes and additions are the following:
1. Establishment of the Riverdale, Md MH (Homing Beacon)
Commissioned April 27, 1949
2. Establishment of the Springfield, Va. MH (Homing Beacon)
Commissioned April 27, 1949
3. Decommissioning of the Andrews Field, Md. MRL (Radio Range)
Decommissioned Nov. 1, 1949
4. Modification and realignment of the Brandywine, MD. SMRL to an SMRA, to be called Andrews, Md. SMRA (Radio Range)
Commissioned Nov. 3, 1949
5. Establishment of the Manakin, Va. MHW (Homing Beacon)
To be commissioned soon
6. Establishment of the Tappahannock, Va. MRLW (Radio Range)
Commissioned Nov. 25, 1949
7. Relocation of the Washington, D. C. SRA (Radio Range)
Estimated date of commissioning January 10, 1950
8. Decommissioning of Washington D. C. ILS OMK and commissioning of Washington, D. C. ILS MMK (Compass Locator)
Estimated date of commissioning January 10, 1950
9. Relocation of Mt. Vernon, Va. FM-MHW (Fan Marker & Homing Beacon)
Estimated date of commissioning January 10, 1950
WASHINGTON-RADIO: USAF National MEW radar transmits and gds on req: 126.18, 137.88, 143.38, 134.1 mc; transmits and gds cont: 137.7, 121.5 mc. (11-25)
WASHINGTON-SPECIAL NOTICE: The CAA regards the Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac Riv,

When tetrahedron points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (11-8)
1800' ext avail NE end NE/SW Rnwy. (11-8)
SPOKANE-GEIGER FLD: Equip on fld. (9-27)
TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Cables and temp foot bridge will stretch across Puget Sound between high banks and supporting twrs. (4-12)
TOLEDO INT FLD: Turf lndg area clsd. Use rnwy only. (11-29)
WENATCHEE: Unmrkd p-line crosses Columbia Riv 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (5-16)
WHIDBEY ISLAND NAS (AULT FLD): Ctn, remain in center rnwys. Open drainage gutters sides both rnwys. Obst area extreme apch end of Rnwy 12 and taxiways, mrkd. Ctn, const on rnwys and taxiways. (5-27)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Kanawha County Court House, Charleston, W. Va.
CHARLESTON-KANAWHA CO. ARPT: Ctn, equip on fld, SE side Rnwy 5-23, and crossing Rnwy 15-33 days. Obstn mrkd, day, ngt. Ramp SW side clsd, const, mrkd. (11-14)
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (10-21)
RAVENSWOOD ARPT: NW/SE Strip clsd. (10-24)
S. PARKERSBURG-GUINN'S ARPT: E/W Strip clsd. (10-24)
WHEELING-OHIO-CO. ARPT: Black snow flags erected near each rnwy lgt. (11-21)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 638 State St., Madison 3, Wis.
GLIDDEN: Const new arpt 1 mi SE at lat 46-07-15, long. 90-34-30. Unusable. (10-12)
GRANTSBURG-RADIO: Temporarily, scheduled bdcasts made on the hr and 30 min past the hr. Teletype svc will be inaugurated at a later date. (8-2)
**MADISON ARPT: Dec. 21, Strip lgts on Rnwy 8 and 26 decomm. (12-21) Flood lgts Rnwys 13 22,31 inop. Numerous cable trenches along all rnwys and extreme ends of Rnwys 4-22, and 13-31. Equip on fld days. Sod unsafe. Due to non-visibility from twr, twr unable to ctl tfc on SE ramp. (12-21)
MILWAUKEE-GENERAL MITCHELL FLD: Rnwy 9-27 not to be used at any time with wind under 8 mph except in emerg or upon demand by pilot for definite reason, or take-off in inst weather to expedite tfc. Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. (11-30)
WAUTOMA ARPT. Apch clearing not completed. (11-30)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.
AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (11-9)
BRIDGER INT FLD: Use mrkd harrowed strip (300 x 4500') running E and W parallel NE bndry. Rest of fld covered with snow and ice. (12-24)
CASPER-RADIO: VHF omnirng courses between 10° and 35° from stn not flyable at minimum instrument alt beyond 35 mi. (10-11)
**CASPER-NATRONA CO ARPT: Correct lat 42-54-30, long 106-27-40. (11-9) Rnwy lgts on Rnwys 2, 5 inop. (9-20)
**CASPER-WARDWELL ARPT: Correct lat 42-54-45, long. 106-21-00. (11-9)
★CHEYENNE-RADIO: Dec 30, 1949, Meadows FM on N crs permanently decomm. (12-30)
LARAMIE-RADIO: LF rng course monitor. device decomm. (10-18)
PINE BLUFFS ARPT, SITE 44, SLC-OMA: Clsd ngts, high vegetation. Use strips between green apch lgts on E/W and N/S apchs days only. Red flash. hazard lgts and red flags displayed on twr. (11-1)
RAWLINS ARPT: Use new ENE/WSW and N/S Strips only. (11-9)
SHERIDAN CO. ARPT: N/S Rnwy clsd to acft heavier than DC-3. (11-9)
**WORLAND ARPT: Correct lat 43-58-15, long. 107-57-15. (11-3)

(1-3-50)

DO YOU KNOW WHAT THE BIG "ϕ" MEANS?

When you see a large "ϕ" in the center of an airport, that airport is closed. Do not attempt a landing.

When you see an "ϕ" on a runway, that runway is closed and hazardous for use. Do not use it!

Below is Technical Standard Order -N16 which the CAA has promulgated for a Closed Airport and Runway Marker:

SUBJECT: CLOSED AIRPORT AND RUNWAY MARKER

INTRODUCTION

Accidents due to aircraft landing at airports which have been closed because of construction or for other reasons have long been a source of concern to the Civil Aeronautics Administration. Such accidents have occurred even though the Airman's Guide and its predecessor publications have carried notices of closed or abandoned airports.

The purpose of this Technical Standard Order is to specify the standard closed airport and runway marker and to recommend its use by all airports concerned. As in the past, it is essential that a closed airport or runway notice be transmitted to the Civil Aeronautics Administration for inclusion in the Airman's Guide.

Copies of this Technical Standard Order and the attached drawing may be obtained from the Civil Aeronautics Administration, Aviation Information Staff, Washington 25, D. C.

DIRECTIVE

In accordance with the procedure for establishing technical aeronautical standards specified in Administrative Order No. 56 and Standard Practice No. 6370, the "Closed Airport and Runway Marker" set forth below and shown on attached CAA Airport Engineering Division Drawing No. 839 is established as a Technical Standard Order.

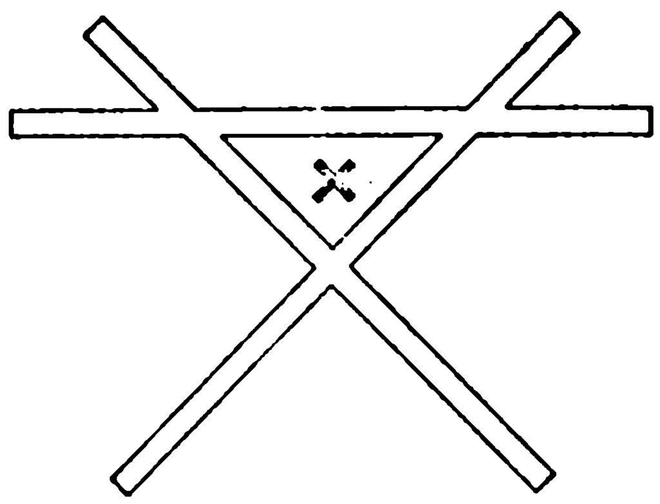
This Order is a mandatory Civil Aeronautics Administration policy and shall govern all employees of the Civil Aeronautics Administration in their recommendations to the public concerning the closed airport and runway marker.

Deviations from standards prescribed by this Technical Standard Order will be permitted only upon approval of the Chief, Airport Engineering Division, Office of Airports, Civil Aeronautics Administration, Washington 25, D. C.

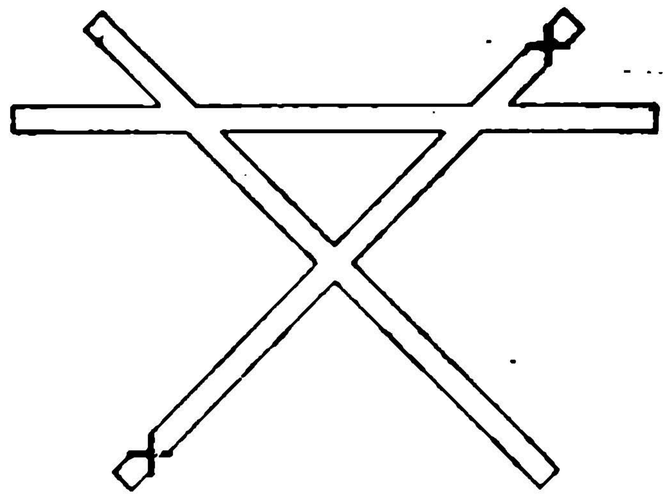
SPECIFIC INSTRUCTIONS

The closed airport and runway marker shall be constructed in accordance with the attached illustration and of a color which will furnish maximum contrast between the marker and its background. When the entire airport is closed to traffic the marker should be located in a prominent place on the landing area. When only one of several runways or landing strips is closed to traffic the marker should be located on and near each end of that runway or landing strip. At airports already equipped with a Segmented Circle Airport Marker System the closed airport indication must be applied as required in TSO-N5.

The information contained in the foregoing paragraph, together with a copy of the attached drawing (CAA Airport Engineering Division Drawing No. 839) should be posted on all airport bulletin boards.

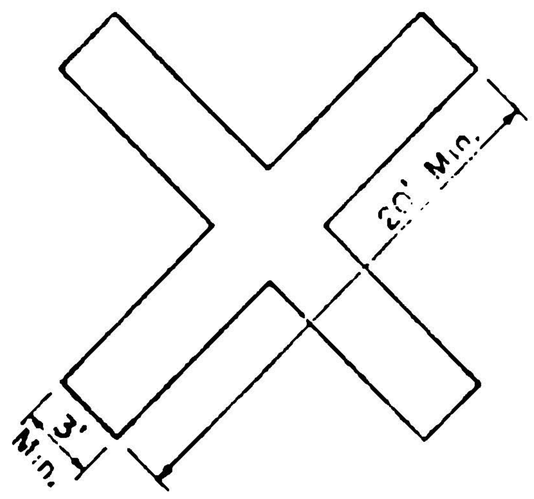


ENTIRE AIRPORT CLOSED



ONE RUNWAY CLOSED

TYPICAL INSTALLATIONS



DETAIL OF CLOSED AIRPORT AND RUNWAY MARKER

GENERAL NOTES

1. The marker should be constructed of durable waterproof material and it should be as large as possible but not smaller than shown in the detail. In areas where snow is expected the marker should be constructed so that it will shed snow.
2. Color of sign material (natural or applied) should provide maximum contrast with background area.
3. The marker should be installed at a suitable height above the ground to prevent it from becoming obscured by vegetation, water, or earth.
4. Where a paved runway is closed, the marker may be painted on the runway provided it will not become obscured as noted above.

AMAN'S

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airports closed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICE

CAA Towers Again Guarding 3117.5 Kc Continuously:

Effective immediately, continuous guard of 3117.5 kc has been established at all continental U. S. airport control towers.

Navy and Marine Corps Guard On 3105 Kc Being Discontinued:

The only activities which will maintain guard on this frequency will be those requiring same due to the presence of civil aircraft on the field, in the traffic pattern, or upon receipt of a civil inbound flight plan.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS AIR FORCE AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Air Force towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified. → New or revised data. + =additional data will be found in Notices To Airmen section

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: See "VOR Use" page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicates by parenthetical (2). Category III= Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE; Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . .Control Tower, CAA
CA. . .Control Tower, Air Force
CI. . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
L. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . .VHF middle marker
MMK. . .Compass locator station when combined with middle marker of ILS.
MOR. . .Low frequency omni-directional range.
MRA. . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL. . .Range (loop radiators), power 50 or more, but less than 150 watts.
OM. . . .VHF outer marker
OMK. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more.
RL. . . .Range (loop radiators), power 150 watts or more.
S. . . . .Simultaneous (range signals and voice) type of transmitter.
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency.
VAR. . .Visual-aural VHF range
VOR. . .Visual omni-directional VHF range
W. . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

= Guards same VHF frequencies station transmits
(1) = 3105, 4495 kc Guarded
(2) = 3105, 4495, 3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105, 4495, 3117.5 kc; 122.1, 126.7, 140.58 mc. This group of frequencies is group generally guarded by INSACS.
NOTE: (3) - 3117.5 kc = guards every frequency in (3) except 3117.5 kc.
(3), 6210 kc = guards every frequency in group (3) plus 6210 kc.

1. - The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. - Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all C.A.A. airway communication stations on April 1, 1950.
3. - Range courses are magnetic in -bearings

→ = New facilities or name changes, see page XIX
+ = additional data will be found in Notices To Airmen section.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or *
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.

NOTE: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Strip lights or portable runway lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway
- 5 - Instrument approach
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 73/80 oct.
F2: 73/80, 91 oct.
F3: 73/80, 91, 100 oct.

NOTE: If only 91 and/or 100 octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Army and Navy Fuel:

A+: 145 oct.	C : 73/80 oct.
A : 100 oct.	J : JP-1
B : 91 oct.	

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

NOTES

1. → New or revised data.
2. SCHEDULES AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields"

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Drookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. ; Wash National Arpt., D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla;Wash, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency

U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949"

USAF AND NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at AF installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc. all USAF GCA installations will, until approximately January 1, 1950, maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations, Channel A (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (11-17-49)

CORRECTIONS AND AMENDMENTS TO A.N 08-15-1: (Canadian Data) (1) Correct page 26, by showing Chatham, N.B. GCA fac no longer xmits and revs 139.90. 140.58 mc also xmits and gds 116.1, 139.14; also gds 200-500 kcs and 1.5 - 15 mc.

(2) Correct page 4, by showing Princeton, B.C. Elevation: 2298'

(3) Correct page 38, by showing Toronto ILS also avail on Channel Y, heading 324°

(4) Correct page 8, by showing Rivers Twr opers cont.

(5) Correct page 24, by showing St. Hubert RCAF, P.Q. VHF/DF opers 0800-1700 and on request. Also correct Rockcliffe. VHF/DF to show oper on 137.70 mc.

(6) Correct page 38, by showing Downsview Twr oper 0830-1630 daily: Centralia VHF/DF oper 0800-1700 Mon thru Fri; Hamilton (Mt Hope) Twr oper 0830-1630 Sun thru Thrus incl only (U. S. Data) (1) Correct page 14, by showing Lewiston range also xmitg and gdg 121.5 mc

(2) Correct page 18 by showing Watertown range also gdg 121.5 mc.

(3) Correct page 22, by showing Stirling, Ont (Trenton). VHF/DF oper on 137.7, 121.5 mc. Delete 140.58 mc.

(4) Correct page 26, by deleting Bangor (Dow AFB). Me.

(5) Correct page 30, by showing Ogden. Corrine MHW fac - freq 209 kc: Promontory Point Freq. 375 kc.

(6) Correct page 43, by showing Altamount compulsory reporting point.

(7) Correct page 100, by showing Springfield, Ill., associated field as (Capital).

(8) Correct page 117, by deleting Greenville AFB. S. C. listing of mil awys stn: Columbus, Miss., listing of mil awys stn

(9) Correct page 154 by deleting Columbus AFB. Miss., in Station Index.

CORRECTIONS AND AMENDMENTS TO T. O. 08-15-3 AND PHACUS: Correct Instrument Approach Procedures listing as follows:

(1) Mitchel AFB, N. Y. utilizing Mitchel Rng, Ident HEM, Freq 227 kc has been approved and authorized for use in TO 08-15-3 and PHACUS: - Initial Apch Alts: NE - 1500' (Int E leg LGA); SE - 1500' (Int SW leg ISP); SW - 1500' (Int SE leg IDL); NW - 1500' (Int NE leg IDL) Shuttle: Standard Eliptical Holding Pattern from range stn to a point two (2) min. out SE leg, all turns to the right holding north of the SE rng leg. Final Apch Leg - NW leg Mitchel rdo rng Procedure turn: Right turn off SE course of rng leg (121°) to a heading of 166°. Turn at a point three (3) mins out or at Babylon FM whichever is closer to rng stn. Do not proceed beyond a point 15 mi SE of rng stn, not above 1500'. Low Cone: 800'. Mag bearing and dist stn to fld: 301°, 3.2 mi. Ceiling over airport: 500'. Min Alt over airport: 585'. Missed Apch Procedure: Climb straight ahead not above 800' for not more than 1 min. Rgt turn to 75° intersection E leg LGA (209) not above 1500'. Rgt turn to 94° proceed to St. James intersection and hold N side of LGA east of St. James intersection at 1500' in standard eliptical holding pattern.

(2) Quonset Point NAS, R. I. - Complete procedure turn on W side SE leg. Missed apch procedure: Make 180° turn to right (East) and climb to 1500' on SE leg Contact Quonset Twr for further instructions.

(3) Correct page 51, by changing Eglin AFB, Fla., mag bearing and dist stn to fld: 178°, 3.9 mi.

(4) Correct page 137, by changing St. Louis (Lambert Fld), Mo., mag bearing and dist stn to fld: 255°, 2.0 mi.

(5) Correct page 135, by changing Rochester, N. Y., mag bearing and dist stn to fld: 312°, 2.1 mi.

(6) Correct page 109, by changing New Orleans (Moisant Airport). La., mag bearing dist stn to fld: 264°, 3.1 mi.

(7) Alexandria, Min.: - Missed apch procedure: Climb to 2600' on S leg. Rem: Stack - 1 1/4 mi N of arpt. - 1590' MSL - Water tank - 1563' MSL. Rdo twr 2 mi N 1500' MSL.

(8) Atlanta NAS, Ga.: - Complete procedure turn within 10 or 15 mi at min alt 2500', within 20 or 25 mi at 3000' : Missed apch proc: Climb to 3000' on E crs within 25 mi.

(9) Boston, Mass.: - Change initial apch alt from N to: 1700 (Int SW leg PWM (Portland).

(10) Burbank, Calif.: - Change initial apch and min alts from NW to following: *NW - 5000' (Int SW leg EHA) (Simi Int). *NW - 4750 Simi Int. (final). *NW - 1500 (Chatsworth H final) Procedure turn: W of Chatsworth "H" on S side NW course. Low cone: 1500. Change footnotes to read as follows: *Sliding scale based on tops reported at Simi Intersection:

For Top: 5000, 5500, 6000, 6500, 7000, 7500'.
Ceiling : 6000-700N, 900, 1300, 1700, 2100, 2500.

Apchs normally start from primary holding fix at Simi Int. All procedures, including procedure turn must be on top and not below 5000'. After procedure turn or after leaving Simi Int, cross Chatsworth H inbound at 4750'.

(11) Cheyenne, Wyo.: Change shuttle to : On E leg to 8000 within 25 mi.

(12) Concord, N.H.: Change initial apch from NW to 5000 (Int SW leg MPV (Montpelier)). Low cone: 1400.

(13) Erie, Pa.: Change initial apch alt from SW to 2200 (Int N leg YNG).

(14) Jackson, Miss.: Missed apch procedure: Climb to 1600 on S leg or (when directed by ATC) climb to 1800' on E leg of Jackson range.

(15) Kansas City, Mo : (Fairfax Arpt) Change initial apch alt as follows: SE - 2600 (Int E leg NUU) (Belton Int). SW - 2000 (Int S leg STJ) (De Soto Int). Under Min Alt authorized after passing marker or Int: Change NE as follows: 2200 (Int W leg CBI) (Excelsior Springs Int). Delete SW alt. Show bearing to fld of 130°. Under ctn remarks, delete sentence re construction derricks and sub: Cracking plant 902' MSL and stack 869' MSL 1/2 mi. ESE apch end rnwy No. 35.

(16) Kansas City, Mo.. (Municipal) Change initial apch alts as follows: SE - 2600 (Int E leg NUU) (Belton Int). SW - 2000 (Int S leg STJ) (De Soto Int). Under Min Alt authorized after passing marker or Int, change NE as follows: 2200 (Int W leg CBI) (Excelsior Springs Int) Delete SW alt: Sub: Ctn remarks as follows: Take-offs to S and SW when weather is BELOW 1000-3 will assume a heading of at least 210° mag as soon as practicable after take-off and maintain heading until reaching 2500' prior to making left turn. Obstructions 1430' MSL located 2.5 mi SE of airport. Cracking plant 902' and stack 869' MSL. 6 mi NW of apch end of rnwy No. 17. Tower 1650' MSL. 2.9 mi S of airport.

(17) Little Rock, Ark.: Change initial apch alts: NE - 1600 (Int N leg SGT). NW - 3800 (Ft. Smith RBN). Missed apch procedure: Climb to 3000 on NW leg within 25 mi and return to stn or (when directed by ATC) turn right and climb to 1600' on NE course within 25 mi.

(1-17-50

(26) Pittsburgh, Pa.: Change initial apch alt from NW to 2600 (Int S leg YNG). Change min alts authorized E - 2600 (New Alexandria Int). SE - 2500 (Mt. Pleasant Int). W - 2000 (Cecil FM - Final). Low cone: 2000. Missed apch procedure. Climb to 2600 on E leg within 25 mi, or (when directed by ATC) climb to 4000 on SE leg and hold NW of Mt. Pleasant FM on SW side SE leg. Airport elevation 1252. Min alt over fld 1752'. Distance, stn to fld, 2.3 mi.

(27) Tulsa, Okla.: Change initial apch alts: SE - 2600 - Ft. Smith RBN. NW - 2300 (Int S leg ICT). Change Min Alat authorized from NE to 1300 (Verdigris River FM-Final). Delete note: Operated by Aerinc. Missed apch aprocedure: Climb to 2200 on SW leg within 25 mi or (when directed by ATC), turn right and climb to 2300 on NW leg within 25 mi.

(28) Westfield, Mass.: Change initial apch alts from NW - 4500 (ALB rng stn) Low cone: 1800'.

(29) Williamsport, Pa.: Missed apch procedure. If contact not established within 2 mi after passing rng stn, climb to 3600 on E leg.

(30) New Castle, Del.: Change heading to Wilmington, Del. Change heading to Wilmington, Del. Change initial apch alts as follows: N - 1800 (Int W leg PHL). W - 1800 (Int W leg PHL).

(31) Denver, Colo. (Lowry AFB).: Change the Min Alt authorized after passing marker or int from W to 10,000 (Superior FM - E bound only.) Shuttle: On N leg within 25 mi, or when directed by ATC on S leg between range station and Aurora FM or on E leg within 25 mi.

(32) Fort Worth, Tex.: - (Carswell AFB) - Change initial apch alts as follows: E -2200 (Int N leg DAL). W-2500 (Mineral Wells RBN). Change Min Alt authorized from W to 2300 (Weatherford FM).

(33) Craig AFB, Ala.: Change initial apch alts to the following: NE 2000 (Int S Leg BHM). SE - 2000 (Int SW leg MSF). SW - 2000 (Int N leg PNS). NW - 2000 (Int SW leg BHM). Delete Min Alt authorized from NW of 1200 (Int W leg MXF). Missed apch procedure: Proceed out NW leg climbing to 2000 within 25 mi of stn. Low cone: 1000. Remarks: Holding procedure on SW leg due to Green 6 Montgomery and Mobile and Blue 3 Montgomery to Birmingham. Complete procedure turn within 10 mi at min alt of 1200, within 15 mi at 1700.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

NAVY AND USAF GCA CHANNELS: See item under Air Force Special Notices, entitled, "USAF and Navy GCA Channels".

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 109, 1724 F Street N. W., Washington 25, D. C.

CAA CONTROL TOWERS RE-ESTABLISH CONTINUOUS GUARD ON 3117.5 KC: Effective immediately CAA control towers re-established continuous guard on 3117.5 kc.

SURFACE WIND BROADCASTS AND TRANSMISSIONS: Effective December 1, 1949, CAA Airway Communications Stations give the direction of their local surface wind to 16 points of the compass magnetic in weather broadcasts and in all other Ground/Air transmissions. Surface winds other than local will continue to be given to 16 points of the compass true which is the way they are transmitted on teletype.

VHF-IFR FLIGHTS: On routes which are implemented with but one type of radio range (either L/MF or VHF), air traffic control is exercised on the basis of the type of facility available and the pilot need not specify the type of facility in his flight plan. On routes which are implemented with both L/MF radio ranges and VHF radio ranges (either VAR or VOR), air traffic control is exercised on the assumption that aircraft are utilizing the L/MF radio ranges and pilots should not use the VHF ranges to conduct flight on these routes in IFR weather unless the ATC clearance so authorizes. Therefore, if a pilot desires to conduct IFR flight on such a route by using VHF ranges over all or a portion of this route, his flight plan should so indicate.

STATION LISTENING WATCH: Frequencies guarded by communications stations and control towers have been incorporated in the ANRA section as a new feature. We request any station finding discrepancies in frequencies cited to advise Civil Aeronautics Administration, W-156, Washington 25, D.C.

NON-COMMISSIONED VHF OMNIRANGES: Because the asterisk previously prefixing on-test or non-commissioned omniranges was not sufficiently noticeable, it has been dropped and replaced by the following phrase in the last two columns of the Air Navigation Radio Aids listing: "NON-COMM", for non-commissioned.

INITIAL RADIO CONTACTS: Pilots of civil itinerant aircraft are requested to identify their aircraft fully on the initial contact with CAA facilities as follows: (make) . . . . (all digits of certificate number) . . . . (letter suffix, if any) e. g.,

"BEECHCRAFT ONE FOUR SEVEN TWO FIVE"
"STINSON TWO THREE SIX-YOKE"
"NAVION FIVE ZERO ZERO SEVEN"

After communications have been established, an abbreviated form of identification may be used, if desired, as follows:

"STINSON THREE SIX-YOKE" (Last 3 units of registration number only).

DIRECT ROUTE IFR FLIGHTS: On long distance direct IFR flights which may cross or coincide with civil airways for only a short distance, the flight should be planned so that at least one designated or on-request reporting point will be crossed in each Air Route Traffic Control Flight Advisory Area through which the flight is to be conducted. For detailed information concerning this subject consult page 11 of the Flight Information Manual dated August 1, 1949.

FREQUENCY UTILIZATION PLAN 108-132 MC:

108.1 thru 111.9 mc: [1]AIR NAVIGATION AIDS: Instrument landing localizer with simultaneous radiotelephone channel.

112.1 thru 117.9 mc: AIR NAVIGATION AIDS, airway track guidance (ranges).

118.1 thru 121.3 mc: AIR TRAFFIC CONTROL COMMUNICATIONS, ground to air

121.5 mc: [2-4]EMERGENCY. (1-17-50)

121.7, 121.9 mc: [3]AIRPORT UTILITY, Simplex or Crossband.
122.1, 122.3 mc: PRIVATE AIRCRAFT ENROUTE - Air to Ground.
122.5 thru 122.9 mc: PRIVATE AIRCRAFT TO TOWERS - Air to Ground.
123.1 thru 123.5 mc: FLIGHT TEST AND FLYING SCHOOLS (Shared), Simplex.
123.7 thru 125.5 mc: APPROACH CONTROL - Air to Ground.
125.7 thru 126.5 mc: AIR CARRIER - Aircraft to Towers.
126.7 mc: AIR CARRIER - Aircraft to Airways Stations.
126.9 thru 131.9 mc: AIR CARRIERS ENROUTE, Simplex.
132.1 and higher: GOVERNMENT.

General Note: The above utilization plan when fully implemented contemplates crossband communications except in the case of "Air Carriers Enroute" communications which will be on a simplex basis, and "Airport Utility" communications which may be either crossband or simplex. The target date for full implementation is July 1, 1950. Simplex communications will be permitted during this interim period in those cases where equipment in use will not permit crossband. It is expected that implementation of crossband operation will commence immediately.

[1]The frequencies 111.1 thru 111.9 mc have a secondary use in the U.S. as airway communications channels.

[2]The military will use 140.58 mc in the interim period and will authorize its use by other aeronautical services.

[3]Power and antenna height shall be restricted to the minimum to achieve the required service.

[4]No carrier frequency closer than 150 kc to the emergency frequency in the VHF aeronautical frequency band should be assigned.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. Instrument Approach Chart-Range, AL 553, dated September 26, 1949 by showing Geiger Tower, Spokane, Wash., radio range course designations listed under Initial Approach data as follows: N, E, S, W.

DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS: Effective 0001 EST, January 20, 1950, Civil Airways, Control Areas, Control Zones, and Reporting Points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green Airway No. 5 (Los Angeles, Calif., to Boston, Mass.) Change "Brandywine, Md." to read "Andrews, Md." and "Jack's Creek, Tenn.," to read "Jackson, Tenn."

(2) Amber Airway No. 7 (Key West, Fla., to Caribou, Me.). . . Richmond, Va. range station; the intersection of the N course of Richmond, Va. range and the SW course of Washington, D.C. range; Washington, D.C. range stn; the intersection of the NE course of Washington, D.C. range and the W course of Philadelphia, Pa. range, excluding that portion more than 3 miles east of the SW course of Washington, D.C. range between Doncaster, Md. FM and the intersection of the SW course of Washington, D.C. range and the NW course of Tappahannock, Va. range; Philadelphia, Pa. range station. . .

(3) Red Airway No. 19 (Grand Rapids, Mich., to Norfolk, Va.). From Grand Rapids, Mich. range stn via the intxn of the SW crs of Grand Rapids, Mich. rng and the N crs of Goshen, Ind. rng to Goshen, Ind. rng stn. From the intxn of the E crs of Goshen, Ind. rng and the NW crs of Ft. Wayne, Ind. rng via Ft. Wayne, Ind. rng stn to Dayton, Ohio rng stn. From the intxn of the W crs of Pittsburgh, Pa. rng and the NW crs of Morgantown, W.Va. rng via the Morgantown, W.Va. rng stn to the intxn of the SE crs of Morgantown, W.Va. rng and the W crs of Front Royal, Va. rng. From the intxn of the N crs of Richmond, Va. rng and the NW crs of Tappahannock, Va. rng via Tappahannock, Va. rng stn to the intxn of the SE crs of Tappahannock, Va. rng and the NW crs of Langley, Va rng, excluding those portions more than 2 miles either side of the NW crs of Tappahannock, Va. rng and more than 3 miles on the E side of the N crs of Langley, Va. rng.

(4) Red Airway No. 20 (Lansing, Mich., to Washington, D.C.) Delete the phrase: "excluding that portion which lies more than 3 miles N of the SE crs of Washington, D.C. rng between the intxn of the SE crs of Washington, D.C. rng and the S crs of Baltimore, Md. rng and and Red Airway No. 77".

(5) Red Airway No. 29 (Rochester, N.Y., to Baltimore, Md.) Change "Brandywine, Md." to read "Andrews, Md.".

(6) Red Airway No. 37 (Dallas, Tex., to Gordonsville, Va.). . . to the Gordonsville, Va. range station.

(7) Red Airway No. 45 (Blackstone, Va., to Allentown, Pa.). From Blackstone, Va. rng stn via Manakin, Va. H fac.; the intxn of the S crs of Quantico, Va. (Navy) rng and the SW crs of Washington, D.C. rng; Quantico, Va. (Navy) rng stn to the intxn of the N crs of Quantico, Va. (Navy) rng and the NW crs of Washington, D.C. rng, excluding that portion which lies more than 2 miles W of the N crs of Quantico, Va. (Navy) rng between the rng stn and the intxn of the N crs of Quantico, Va. (Navy) rng and the NW crs of Washington, D.C. rng. From Washington, D.C. rng stn. . .

(8) Red Airway No. 77 (Richmond, Va., to Millville, N.J.) From Richmond, Va. rng stn via Tappahannock, Va. rng stn to Millville, N.J. rng stn, excluding that portion below 6000' which lies over danger areas.

(9) Blue Airway No. 56 (Elizabeth City, N.C., to Washington, D.C.) Change "Brandywine, Md." to read "Andrews, Md."

CONTROL AREAS: (1) Red Airway No. 19 (Grand Rapids, Mich., to Norfolk, Va.)-CAPTION CHANGE.

(2) Red Airway No. 37 (Dallas, Tex., to Gordonsville, Va.)-CAPTION CHANGE.

(3) Red Airway No. 45 (Blackstone, Va., to Allentown, Pa.)-CAPTION CHANGE.

CONTROL ZONE: Washington, D.C.: Within a 5 mile radius of Washington National Airport (excluding the portion overlapping the Washington Airspace Reservation) and extending to include the segment of a circle 15 miles in radius centered on the Washington National Airport bounded on the W by a line 2 miles W of the SW crs of Washington rng and on the E by a line 2 miles E of the ILS loizr crs.

REPORTING POINTS: (1) Green Airway No. 5 (Los Angeles, Calif., to Boston, Mass.). Change "Brandywine, Md." to read "Andrews, Md."

(2) Red Airway No. 19 (Grand Rapids, Mich., to Norfolk, Va.)-CAPTION CHANGE.

(3) Red Airway No. 20 (Lansing, Mich., to Washington, D.C.). Akron, Ohio rng stn; the intxn of the S crs of Youngstown, Ohio rng and the NW crs of Pittsburgh, Pa. rng; the intxn of the NW crs of Washington, D.C. rng and the E crs of Martinsburg, W.Va. rng; the intxn of the SE crs of Washington, D.C. rng and the NE crs of Patuxent River, Md. (Navy) range.

(4) Red Airway No. 37 (Dallas, Tex., to Gordonsville, Va.)-CAPTION CHANGE.

(5) Red Airway No. 45 (Blackstone, Va., to Allentown, Pa.)-CAPTION CHANGE.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. Rdo Facility Chart by deleting New Hampshire National Guard AACS activity at Grenier AFB.

DESIGNATION AND REDESIGNATION OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS: Effective January 14, 1950, Civil Airways, Control Areas, Control Zones and Reporting Points were amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Blue Airway No. 24 (El Centro, Calif., to Daggett, Calif.). . . Indio, Calif., rdo rng stn to the Daggett, Calif., rdo rng stn.

CONTROL AREAS: (1) Blue Airway No. 13 (Houston, Tex., to Minneapolis, Minn.). . . All of Blue Airway No. 13 from the Houston, Tex., rdo rng stn to a line extended at right angles across such airway through a point 25 mi NE of the Houston, Tex., rdo rng stn; from a line extended at right angles across such airway through a point 25 miles SW of the Shreveport, La., rdo rng stn to the Stanton, Minn., non-directional rdo bcn.

(2) Blue Airway No 22 (Memphis, Tenn., to Wichita, Kans.) . . . All of Blue Airway No. 22.

(3) Blue Airway No 24 (El Centro, Calif., to Daggett, Calif.) . . . CAPTION CHANGE.

CONTROL ZONES: (1) Fort Smith, Ark., is added to read . . . within a 5 mile radius of the Fort Smith Municipal Airport extending 2 miles either side of a track 360° mag to a point 10 miles N of the airport.

REPORTING POINTS (1) Blue Airway No. 13 (Houston, Tex., to Minneapolis, Minn.) . . . Fort Smith, Ark., non-directional rdo bcn.

(2) Blue Airway No. 24 (El Centro, Calif., to Daggett, Calif.) CAPTION CHANGE.

COMPULSORY AND ON-REQUEST REPORTING POINTS: Effective Jan. 20, 1950, the following Compulsory Reporting Point will be Estab: (1) Shenandoah Intsxn - Intsxn of the E crs of Martinsburg, W. Va., and the NW crs of Washington, D. C.

Effective Feb. 7, 1950, the following Compulsory Reporting Points will be Established.
(1) Wheeling Intsxn - W crs Pittsburgh, Pa., and NW crs Morgantown, W. Va.
(2) Flintstone Intsxn - S crs Altoona, Pa., and NW crs Washington, D. C.
(3) Adamsville Intsxn - E crs Columbus, O. and a 360° mag. bear. from Zanesville, O. MH fac. (formerly Zanesville Intsxn).

Effective Immediately the following On-Request Reporting Points Are Established:
(1) Blairton Intsxn -NE crs Martinsburg, W. Va., and NW crs Washington, D. C.
(2) Brooke Intsxn -S crs of Quantico, Va., and NW crs Tappahannock, Va.
(3) Forked River Intsxn -SW crs Mitchel, N. Y. and NE crs Millville, N. J.
(4) Grubbs Intsxn -SW crs Washington, D. C. and NW crs Tappahannock, Va.
(5) McKenney Intsxn -SW crs Richmond, Va., and SE crs Blackstone, Va., (formerly Rawlings Intsxn)
(6) Glenwood Intsxn -E Lincoln, Neb., and S omaha, Neb. (delete Tabor Intsxn)

NON-STANDARD HOLDING PATTERNS: Effective immediately the following Non-Standard Holding Patterns are Established: Holding Point - Atlanta, Ga., ILS Outer Marker direction from Holding Point - W, direction of turn - right on S side of W course of Atlanta, Ga., ILS Localizer, Time - One minute.

(2) Holding Point - Kedzie Compass Locator (on SE course Chicago ILS Localizer), direction from Holing Point, - SE, direction of turn on E side of SE course of Localizer) Time - one minute.

Effective Immediately the Following Non-Standard Holding Patterns Are Deleted: Atlanta (Navy) Range, Atlanta Range, Jonesboro Fan Marker on the SE course of the Atlanta Range.

ATC BOUNDARY REVISIONS: Effective January 14, 1950, the Kansas City, Memphis, St. Louis and Ft. Worth ATC Boundaries Are Revised As Follows:
St. Louis - Ft. Worth, Blue 13-50 miles S of Ft. Smith, Ark.
St. Louis - Memphis, Blue 22 -50 miles E of Ft. Smith Ark.
St. Louis - Kansas City, Blue 22 -50 miles NW of Tulsa, Okla.

DANGER AREA DESIGNATIONS: The following Danger Area amendment is effective on January 20, 1950, unless otherwise advised:

AMENDMENT NO. 24

1. The PATUXENT RIVER, Maryland, Areas are amended to read: Location: (a) Patuxent (Washington and Norfolk Charts); Description: Beginning at lat 38-30-00N, long. 75-34-30W; Southerly along the railroad to Salisbury, Md. at lat 38-22-00N, long. 75-63-00W, Southeasterly following State Highway No. 12 to lat 38-18-45N, long 75-32-05W; SW to lat 37-46-25N, long. 75-59-35W; SSW to lat 37-45-00N, long. 76-00-05W; due W to long. 76-30-10W; NNW to lat 38-05-10N, long. 76-34-05W; NE to lat. 38-11-10N, long 76-25-10W; NE to lat 38-30-00N long 76-04-00W; due E to lat. 38-30-00N, long. 75-34-30W, point of beginning. Altitudes: From 3500' to unlimited. Time: Continuous. Using Agency: Patuxent River NAS, Maryland.

Location: Patuxent (b) Beginning at lat. 38-21-00N, long. 76-14-00W; SW to lat. 38-11-10N, long. 76-25-10W; SW to lat. 38-05-10N, long. 76-34-05W; NNW to lat. 38-15-00N, long. 76-36-35W; NNW to lat. 38-15-05N, long. 76-36-30W; NE to lat. 38-17-25N, long. 76-33-00W; NE to lat 38-25-40N, long. 76-23-35W; SE to lat. 38-21-00N, long. 76-14-00W, point of beginning. Altitudes: Surface to 5000' Time: Continuous Using Agency: Patuxent River NAS, Md.

(c) Description: Beginning at lat. 38-18-26N, long. 76-14-30W; SE to lat. 38-13-00N, long. 76-11-20W; due E to long. 76-00-00W; due S to lat 38-08-00N; due W to long. 76-08-00W; SSE to lat. 37-55-15N long. 76-02-30W; WSW to lat. 37-52-45N, long. 76-11-03W; NW to lat. 38-02-20N, long. 76-17-24W; due N to lat. 38-07-41N; NW to lat. 38-15-00N, long. 76-20-50W, NE to lat. 38-18-20N, long. 76-17-05W; E to lat. 38-18-26N, long. 76-14-30W, point of beginning. Altitudes: Surface to unlimited. Time: Continuous. Using Agency: Patuxent River NAS, Md.

(d) Description: A circle with a radius of 5 nautical miles centered at lat. 37-47-54N, long. 76-03-48W, excluding any portion which overlaps Amber Airway No. 9. Altitudes: Surface to unlimited. Time: Continuous. Using Agency: Patuxent River NAS, Md.

2. The CAMP A. P. HILL, VIRGINIA, Area is amended by changing the "Description by Geographical Coordinates" column to read: Description: Beginning at lat. 38-07-30N, long. 77-07-00W; SSW to lat. 38-02-50N, long 77-08-00W; westerly following the county road to lat. 38-00-25N, long. 77-16-30W; NNW to lat. 38-01-30N, long. 77-16-50W; N to lat. 38-08-40N, long. 77-17-25W, NNE to lat. 38-10-40N, long. 77-16-20W; southeasterly along U.S. Highway No, 17 to lat. 38-07-30N, long. 77-07-00W, point of beginning.

AIRPORT MANAGERS - LET'S PLAY BALL: Please post your Airman's Guide in a prominent place readily accessible for cross-country pilots' study.

Our recent Airman's Guide survey indicated that many new fliers had never heard of the Guide, and that many older fliers did not have access to the wealth of information it contains.

Fliers frequently complain to us of the inconvenieniences caused by temporarily closed airports or abandoned airports of which they were not aware. And not too few accidents and damage suits stem from the same reason. Yet, the Guide in virtually all instances stated that the airports in question were closed or abandoned.

Therefore, we request you to make your Guide readily available to cross-country pilots and to encourage fliers to refer to it.

Remember: For a safe, convenient ride,
Read the Airman's Guide.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat.,	Long.	Elev.	Change in Weather Service
Greenville, South Carolina (AFB)				Hourly report discontinued
Bloomington, Indiana	39-08,	86-37		SW to be available soon
Valentine, Nebraska	42-53	100-33	2581'	SW to be available soon
Burwell, Nebraska	41-47	99-09	2177'	Sw to be available soon
Ajo, Arizona (Ajo Airport)	32-27	112-51		SW to be available soon
Santa Ana, California (Orange County Airport)	33-40	117-52		SW to be available soon

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.), render many fields temporarily unusable or unsafe: In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

(1-17-50)

[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Old Post Office Bldg., Montgomery, Ala.
ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (12-14)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15)
FT. MORGAN AIRFLD: Ctn, grading. (1-13)
LANETT-VALLEY ARPT: E/W Strip clsd, freshly graded, soft. (12-7)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)
MOBILE-BATES FLD-TOWER: Dec 12, MMK on 359 kc, ident "OB" and OMK on 371 kc, ident "MO" were placed in oper on test basis only during daylgt hrs.
MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (6-30)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707-1/2 W., Thomas Road, Phoenix, Arizona.
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (12-29)
**DEWEY-DEWEY-HUMBOLDT ARPT: Correct lat 34-31-45, long. 112-13-30. (12-28)
FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N - Hwy 66; E - Riordan, Ariz.; S - Sycamore, Canyon; W - Garland Prairie.
GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)
PHOENIX: Exten trng on Phoenix Rng on all courses except W. (11-2)
PHOENIX-SKY HARBOR ARPT-TOWER: Effect Dec 15, 1949, CAA ILS was shut down until approx March 25, 1950. (1-9) FLD: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other lndg areas. Nordo crop dusters rstd to use of dirt mat area. (12-15)
**PICACHO PEAK, BCN SITE 6A, 6B, 6C, PHX-ELP: Jan 3, 1950, red code blinkers lctd on Picacho Peak 6 mi NW of Red Rock permanently discont. (1-3)
★TUCSON-RADIO: Jan 5, 1950, NW course of LF rng realigned from 127° to 117°. No change in quads. Soon, Red Rock FM on NW course will be decomm. (1-11) Courses aligned by gnd-check only.
WINSLOW ARPT-TOWER: CAA ILS glide path shut down - unreliable. (12-5)
YUMA COUNTY ARPT: Clsd ngts. Rnwys 8-26 and 3-21 open with ctn advised at intsxns of Rnwy 17-35. Rnwy 17-35 clsd, const. Ctn, holes and hvy equip along rnwy. Bcn inop. (12-14)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Adams Field, P. O. Box 1397, Little Rock, Ark.
FORT SMITH-RADIO: VHF omnirng on 113.1 mc unreliable. (10-15)
FORT SMITH ARPT: Asphalt portion W end E/W Rnwy unsafe for acft of twin-eng size or larger. (11-3) 680' extension on W end E/W Rnwy under const. Equip on fld days. (12-1)
SEARCY ARPT: Gully 1' deep lctd 300 yds from S end across N/S Strip. (12-15)
TEXARKANA-RADIO: VHF omnirng radials 8 mi out from stn, course roughness and mild bends. (11-16) About Feb 27, stn lctn mrkr will be shut down until approx Mar 3 - modification. (1-9)
WALNUT RIDGE-RADIO: LF rng courses aligned by gnd-check only. (11-3) VHF omnirng operg on 115.7 mc normally from gnd observation only. Ctn advised until flgt-checked. (12-20)
[redacted]: SPECIAL NOTICE: The addressees of the CAA District Airport Engineers are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 206 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.
ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these area. (8-15)
BLUE CANYON INT FLD: Clsd (snow). (1-3)
BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. (12-30)
BURBANK-LOCKHEED AIR TERMINAL-TOWER: CAA ILS lclzr and OMK operg on test basis only. Lclzr freq: 109.5 mc, channel X, lctd 150' W of W end E/W Rnwy. Ident: "BUR" OMK freq: 359 kc, ident: "BU" lctd 4.44 mi W of W end E/W Rnwy (on back course lclzr) (10-4). FLD: Clsd to all trans P-80 acft except on special projects for modification. (11-15)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone [redacted]: acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMP PENDLETON OLF (OCEANSIDE): Trans acft clear thru MCAS El Toro. (10-5)
CASTLE AFB (MERCED): Use only Rnwy 12-30, acft parked on lndg mat. (12-22)
CONCORD-BUCHANNAN ARPT: Equip on fld. (10-21)
COSO JUNCTION ARPT: E/W Strip under const. (10-20)
★DAGGETT-RADIO: Jan 15, N and S courses realigned. Courses are: 63 A 148 N 255 A 320 N. Ground-checked only. (1-16)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-31)
EL CENTRO NAS: All rnwy lgts inop. Rnwy lgts 3-21 avail on req. Const on rnwys. (12-20)
EUREKA-HUMBOLDT CO. ARPT: Equip on fld intermittently day, ngt. Ditch on W side NW/SE Taxiway filled but extremely soft. 6' unlgtd jet FIDO unit 800' from SE end Rnwy 31, 200' E rnwy center line. Use runwys, taxiways only. (1-10)
★FAIRFIELD-SUISUN AFB-RADIO: USAF VHF/DF opers on 121.5 mc; 139.32 for trng only; hrs of oper: Cont. (12-21) USAF rng operg normally; multiples and splits beyond 25 mi. (12-1)
FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop until approx Jan 15, 1950. (12-3)
**FT. JONES (new) ARPT: Revised data. Lat 41-33-30, long. 122-51-15. (12-7)
**FORTUNA-ROHNERVILLE ARPT: Correct lat 40-33-15, long. 124-07-45. (12-7)
FRESNO-RADIO: VHF omnirng on 112.9 mc, gnd-checked only. (9-27)
FRESNO AIR TERMINAL-TOWER: CAA ILS glide path and OMK flgt-checked, oper normal. (1-6) Effect. Jan 24, 1950 hrs oper CAA twr will be: 0800-2400. (1-10)
FULLERTON ARPT: Equip on fld. (10-20)
HAWTHORNE ARPT: Equip on N side Rnwy 9-27. (12-15)
HAYWARD ARPT: Const, equip on fld days. Taxiway lgts discont during const. (1-6)
HOLLISTER ARPT: All rnwy lgts inop. (1-7)
LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS operg from temp lctn 1700' W of W end of Rnwy 25L. Course aligned to center of Rnwy 25L and is normal by flgt-check. Lclzr back course not usable. (11-7) FLD: New slope line hi-intensity apch lgt sys operg on test basis. Single white lines 50' from rnwy edge indicates 200' usable width of Rnwy 7R-25L - equip adj to single white lines installing lgts. Rnwy 4-22 open to taxying only. Equip 1000' out on apch to Rnwys 7L, 7R. Use paved areas only. Equip W end Rnwy 25R, const. (1-14)
★MARCH AFB (RIVERSIDE)-RADIO: VHF/DF resumed operational status. Opers: Cont IFR; 0800-1700 daily Mon-Fri. (1-6)
MARCH AFB (RIVERSIDE): Inten inst trng in AT-6 acft days Mon thru Fri. Rnwy 7-25 clsd, parked acft. (12-29)
McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 clsd, parked acft. (12-28)
MOFFETT NAS (MTN VIEW)-RADIO: Navy VHF/DF unreliable. (1-6)
MOFFETT NAS (MTN VIEW): Fld on positive ctl. (8-15)
MOUNT LAGUNA-RADIO: Effect. Nov 21, INSAC hrs of oper for teletype weather reporting and flgt assistance service will be reduced to part time status - hrs: 0500 to 2100, daily. H fac to cont in full time oper. (11-4)
★OAKLAND ARPT-TOWER: CAA twr utility freq was changed from 121.7 mc to 121.9 mc Jan 5, 1950. FLD: Rnwy 6-24 rstd to lndg and take-off of lgt acft and taxying by all acft Channel clsd to seaplanes, LST craft moored in channel. Lgt acft lndg gravel area 27, lnd beyond white line. (1-6)
PASO ROBLES-SHERWOOD ARPT: NW/SE Rnwy ruf at intsxn NE/SW Rnwy. Water standing on NW/SE Rnwy wet weather. Lnd short when using NW/SE Rnwy. (1-6)
REEDLEY-GREAT WESTERN ARPT: 20' extreme SSE end of lndg strip very ruf. (11-16)
SACRAMENTO-RADIO: Auto. rng course monitor device temp decomm. (4-14)
SACRAMENTO ARPT-TOWER: Soon, CAA ILS will be operg on test basis and will serve NE/SW rnwy with apch from SW. Lclzr freq: 109.9 mc, ident: "SAC". OMK freq: 308 kc, MMK freq: 263 kc. Glide path freq: 333.8 mc. (12-27) Disregard spurious signals. FLD: Equip on fld days. (11-13)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. (11-2)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on →

CALIFORNIA: hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (3-4)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr unreliable daylgt hrs due to arpt const in vicinity of transmitter. (12-6) FLD: Turf area clsd. (12-6)
VICTORVILLE AFB: Clsd Sat, Sun & holidays. (10-4)
COLORADO: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.
AKRON-RADIO: About Jan 27, voice communs on LF and VHF omnirng will be inop until approx Jan 31 - relctn of equipment. During this period LF and VHF rngs will be unmonitored. (1-6)
DENVER-STAPLETON ARPT: Rnwy 8L-26R clsd to acft larger than DC-3. (11-9)
LA JUNTA MUN ARPT: Ctc lgts on E/W Rnwy being repaired. (11-9)
PUEBLO: Ordnance depot lctd approx 17 mi E at lat 38-16-53, long. 104-18-09 is conducting all types of demolition work 0800-1630 MST daily thru Jan 1950. (12-29)
PUEBLO ARPT-TOWER: Rcvg freq on 122.5 mc inop at CI twr. (1-6)
TRINIDAD ARPT: Administration bldg being constd N side of fld. (1-9)
CONNECTICUT: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 2200 U.S. Custom House, Boston 9, Mass.
BRIDGEPORT ARPT: After hvy rains pools of water 3 to 4" deep on Rnwy 6-24. (1-9)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test opers days all alts in 75 mi radius. (1-9)
HARTFORD-RADIO: VHF omnirng on 114.9 mc shutdown - relctn. (6-25)
WILLIMANTIC-WINDHAM ARPT: Const off ends all rnwys. Equip on fld. (12-2)
DELAWARE: SPECIAL NOTICE: The address of the CAA District Airport Engineer is P.O. Box 2031, New Castle County Airport, Wilmington 99, Delaware.
DIST. OF COLUMBIA: WASHINGTON NATIONAL ARPT-SPECIAL NOTICE: All military fighter type and all civil fighter type acft are prohibited from using Washington National Arpt.
NOTE: As a general rule, all acft with prefix "P" or "F" are banned and those with prefix "B" are permitted to use fld. (11-21)
WASHINGTON NATIONAL ARPT: USAF: Use of this arpt by USAF acft prohibited except for: (a) Scheduled MATS tfc. (b) Lndgs and take-offs necessary for overseas flgts using customs and immigration clearance facs of aerial port of embarkation. (c) Flgts transporting VIP and General Officers above grade of Major General. Acft utilizing fld under above rstn shall not exceed 120,000 lbs gross wt without expressed prior approval of arpt director. Fighter type acft are excluded from use of this fld.
NAVY: Clsd to all Navy acft except the following: (a) Acft carrying civilian VIP and officers ABOVE rank of Major General and Rear Admiral. (b) Regularly scheduled MATS and logistic support wing flgts. (c) Flgts rqrg customs and immigration services. Acft utilized not to exceed 120,000 lbs gross wt without prior approval arpt director. All Navy acft cleared to this fld taxi to MATS terminal N of Administration Bldg.
COAST GUARD: Clsd to all CG acft except the following: (a) Acft carrying civilian VIP and officers of the rank of Rear Admiral or above. (b) Logistic support flgts with prior approval of arpt director (necessity for such flgts to be cleared with Comdt., CG and to be conducted under VFR conditions only). GENERAL: 2-way rdo rqrd. Stay on paved areas, shoulders soft. Lgtd 168' elevator being erected approx 2 mi S (180° T). Equip on fld. Weather Bureau advised it will be conducting exper observations approx 50' S apch end Rnwy 36 when ceiling 600' or lower and/or visibility 1.5 mi or less. Ceiling balloons will be used during daylgt hrs and sealed beam ceiling lgt durg darkness. Generator lctd approx 500' W Rnwy 18-36 and 400' N of Taxiway 2, bounded by Taxiways 1, 2, and 8 and Rnwy 18-36. 46' boom working in apch lane to Rnwy 36 to the water's edge from 3000' out. U .S. Air Force advises no mil hooded inst flgts will be made within 25 mi radius of DCA National Arpt except that practice runs allowed at Andrews Air Force Base with definite radar ctc only. (12-29)
WASHINGTON -SPECIAL NOTICE: CHANGES IN AIR NAVIGATION FACILITIES-WASHINGTON, D.C. AREA: Certain air navigation facilities in the Washington, D. C. area are now in the process of being relocated and the Area is also being implemented with additional installations. Among the changes and additions are the following:

1. Establishment of the Riverdale, Md. MH (Homing Beacon)
   Commissioned April 27, 1949
2. Establishment of the Springfield, Va. MH (Homing Beacon)
   [redacted].: Commissioned April 27, 1949.
3. Decommissioning of the Andrews Field, Md. MRL (Radio Range)
   Decommissioned November 1, 1949.
4. Modification and realignment of the Brandywine, Md. SMRL to an SMRA, to be called Andrews, Md. SMRA (Radio Range).
   Commissioned November 3, 1949.
5. Establishment of the Manakin, Va. MHW (Homing Beacon)
   Commissioned January 9, 1950.
6. Establishment of the Tappahannock, Va. MRLW (Radio Range)
   Commissioned November 25, 1949.
7. Relocation of the Washington, D. C. SRA (Radio Range)
   Commissioned January 9, 1950.
8. Decommissioning of Washington D. C. ILS OMK and commissioning of Washington, D.C. ILS MMK (Compass Locator).
   Commissioned January 9, 1950.
9. Relocation of Mt. Vernon, Va. FM-MHW (Fan Marker & Homing Beacon)
   MHW commissioned January 13, 1950.
   Estimated date of commissioning of FM January 17, 1950.

WASHINGTON-RADIO: USAF National MEW radar transmits and grds on req: 126.18,137.88, 142.38,134.1 mc; transmits and grds cont: 137.7,121.5 mc. (11-25)
WASHINGTON-SPECIAL NOTICE: The CAA regards the Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac River.
★WASHINGTON-RADIO: Jan 9, 1950, rng decomm and new rng flgt-checked and comm at lat 38-45-57, long. 77-01-37. Freq. 332 kc, ident: "DCA". Courses: 32 A 150 N 214 A 309 N. Elev. 89' MSL. Var. 7°W. Class: SBRA-DTXV. Washington ILS OM is on the new range site in place of Z mrkr. Concurrent with decomm of Washington rng, Mt. Vernon, Va. FM and MHW fac perm decomm at their present site. Jan 13, MHW relctd to E bank of Potomac River at lat 38-40-09, long. 77-04-59. Elev. 40' MSL. Bear. and dist stn to Washington rng: 32°, 7.3 mi. Freq: 269 kc, ident: "MTV". Var. 7°W. About Jan 16, Mt. Vernon, Va. FM will be comm at MHW site, on SW course, ident will be changed to three dashes. Doncaster, Md. FM (on SW course) ident changed to: two dots and three dashes; Alexandria, Va. FM decomm. LF rng usable dist is 65 mi. Lgt multiples all courses beyond 30 mi. SE course has slight bend to NE at 30 to 40 mi. (1-13)
★WASHINGTON NATIONAL ARPT-TOWER: Jan 9, 1950, CAA ILS OMK decomm. Concurrently new OM comm at new rng site, lat 38-45-57, long. 77-01-37. Lctd 5.3 mi from S end of N/S rnwy, keyed cont dashes. Elev. 89' MSL. Class: OM. Glide path intersection at OM 1620' MSL. Jan 14, MMK comm at lat 38-50-01, long. 77-02-10. Lctd 0.82 mi from S end of N/S rnwy, keyed alt dots and dashes. Elev. 13' MSL. Freq. 224 kc, ident: "CA". Concurrently IM decomm. (1-15)
[redacted]: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 430 Lynch Bldg., Jacksonville, Florida.
CECIL NAAS (JACKSONVILLE): Bcn inop. (11-26)
**CEDAR KEY SEAPLANE BASE: Lngst lndg lane 15,840'. (12-9)
CLEWISTON-SUGARLAND ARPT: About Jan 19, arpt will be abandoned. (12-1)
DAYTONA BEACH-KOLEMAN SEAPLANE BASE: Ctn, dredging. 2 unlgtd sand mounds lctd approx 200 yds N and NE. (11-29)
EGLIN AFB (VALPARISO)-RADIO: X-band radar bcn is inop. (11-18) VHF/DF inop. (12-5)
EGLIN AFB (VALPARISO): Acft apchg fld will enter area along rgt edge of S leg Crestview Rng (1) Acft on VFR will fly 3000' or 500' below the ceiling, which ever is lower until cleared by Eglin Twr. (2) Acft on IFR will dpt Crestview Rng at assigned arwys cruising alt and will ctc Eglin Twr immediately for apch clearance. Acft will not proceed to Eglin Rng until cleared by Eglin Twr. Rnwy 13-31 clsd, parked acft. (12-29)
EVERGLADES NATIONAL PARK-SPECIAL NOTICE-NATIONAL PARK SERVICE REGULATIONS ON AIRCRAFT: No person shall lnd acft on lnd or water, in any Federally-owned area within any national park or monument, except for emerg rescue in accordance with the directions of the officer in charge of the park or monument or where such lndg is caused by unforeseeable circumstances beyond the ctl of such person. Failure to comply with National Park Service regulation is a Federal offense punishable by not more than $500 or imprisonment not to exceed 6 months, or both, plus court costs. All waters and submerged lnds are Federally owned within Everglades National Park. (10-1) (1-17-50)

[redacted]: FLEMING KEY: A Temp Ctld Firing Area has been approved for the firing of ground-to-air rockets, from the surface to 10,000', during daylgt hrs, Mon thru Fri, commencing approx Jan 15, 1950, and continuing to approx Feb 15, 1950. The area is described as follows: beginning at lat 24-35-00, long. 81-48-00, thence on a line bearing 225°T for 4 mi, clockwise 180° on a course having a radial point at the p oint of beginning, thence 4 mi on a bearing of 225°T to the point of beginning. Adequate notices to airmen will be issued prior to launching opers.

FT. MYERS-PAGE ARPT: Rnwy lgts 4-22 and 13-31 inop. (1-9)

GAINESVILLE ARPT: Rnwy lgts inop. Use rnwys only. Lgtg repairs adj all pavements. (1-9)

JACKSONVILLE NAS-RADIO: S-band radar bcn (AN/CPN-8) temp installed at lat 30-13-36, long. 81-40-06. Code 1-1-1. (9-22).

WHIDBEY ISLAND NAS (AULT FLD): Ctn, remain in center rnwys. Open drainage gutters sides both rnwys. Obst area extreme apch end of Rnwy 12 and taxiways, mrkd. Ctn, const on rnwys and taxiways. (5-27)

WEST VIRGINIA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Kanawha County Court House, Charleston, W.Va.

CHARLESTON-KANAWHA CO. ARPT: Ctn, equip on fld, SE side Rnwy 5-23, and crossing Rnwy 15-33 days. Obstn mrkd, day, ngt. (1-7)

PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (10-21)

WHEELING-OHIO CO. ARPT: Black snow flags erected near each rnwy lgt. (11-21)

Wisconsin: SPECIAL NOTICE: The Address of the CAA District Airport Engineer is 638 State St., Madison 3, Wis.

GLIDDEN: Const new arpt 1 mi SE at lat 46-07-15, long. 90-34-30. Unusable. (10-12)

GRANTSBURG-RADIO: Temporarily, scheduled bdcasts made on the hr and 30 min past the hr. Teletype service will be inaugurated at a later date. (8-2)

(1-17-50)

[redacted]: MADISON ARPT: Flood lgts Rnwy 13, 22, 31 inop. Numerous cable trenches along all rnwys and extreme ends of Rnwys 4-22 and 13-31. Equip on fld days. Sod unsafe. Due to non-visibility from twr, twr unable to ctl tfc on SE ramp. (12-21)

**MADISON-JACKSON SEAPLANE BASE: PRIVATE. Buoy, ramp. (12-2)

**MILWAUKEE-GENERAL MITCHELL FLD: Use Rnwy 9-27 as taxiway only. (1-10) Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. (1-10)

WAUTOMA ARPT: Apch clearing not completed. (11-30)

WYOMING: SPECIAL NOTICE: The address of the CAA District Airport Engineer is Stapleton Airfield, Denver 7, Colo.

AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (11-9)

CASPER-RADIO: VHF omnirng courses between 10° and 35° from stn not flyable at minimum instrument alt beyond 35 mi. (10-11)

COKEVILLE ARPT: Open to ski-equipped acft only. (1-3)

DOUGLAS-RADIO: About Jan 27, voice communs on H fac and VHF omnirng will be inop until approx Jan 31. During this period VHF omnirng will not be monitored. (1-5)

FT. BRIDGER INT FLD: Use mrkd harrowed strip (300 x 4500') running E and W parallel NE bndry. Rest of fld covered with snow and ice. (12-24)

LARAMIE-RADIO: LF rng course monitor. device decomm. (10-18)

PINE BLUFFS ARPT, SITE 44, SLC-OMA: Clsd ngts, high vegetation. Use strips between green apch lgts on E/W and N/S apchs days only. Red flash. hazard lgts and red flags displayed on twr. (1-5)

RAWLINS ARPT: Use new ENE/WSW and N/S Strip only. (1-5)

SHERIDAN CO. ARPT: N/S Rnwy clsd to acft heavier than DC-3. (1-5)

ADDITIONAL DESIGNATIONS AND REDESIGNATIONS OF CIVIL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES AND REPORTING POINTS:

Effective February 7, 1950 Civil Airways, Control Areas, Control Area Extensions, Control Zones and Reporting Points will be amended in whole or in part as follows:

AIRWAYS: (1) Green Airway No. 3 (San Francisco, Calif., to New York, N. Y.) . . . Cheyenne, Wyo., Rng; North Platte, Neb., Rng. . .

(2) Green Airway No. 9 (Hawaiian Islands). -Is added to read from the intsxn of the S course of the Port Allen, T. H.. rdo rng and the SW crs of the Honolulu, T. H.. rdo rng via the Honolulu, T. H., rdo rng stn to the intsxn of the NE crs of the Honolulu, T. H.. rdo rng and the N crs of the Hilo, T. H., rdo rng.

(3) Amber Airway No. 10 (Hawaiian Islands), is added to read:- From the intersection of the W course of the Hilo, T. H., rdo rng and the S course of the Honolulu, T. H., rdo rng to the Honolulu, T. H., rdo rng stn.

(4) Amber Airway No. 11 (Hawaiian Islands), is added to read:- From the intersection of the S course of the Maui, T. H., rdo rng and the W course of the Hilo, T. H., rdo rng via the Maui, T. H., rdo rng stn to the intersection of the N course of the Maui, T. H., rdo rng and the NE course of the Honolulu, T. H. rdo rng.

(5) Amber Airway No. 12 (Hawaiian Islands), is added to read:- From the intersection of the S course of the Hilo, T. H., rdo rng and a point 25 miles S of the Hilo, T. H., rdo rng stn via the Hilo, T. H.. rdo rng stn to the intersection of the N course of the Hilo, T. H., rdo rng and the NE course of the Honolulu, T. H., rdo rng.

(6) Red Airway No. 13 (Sunbury, Pa., to Boston, Mass.) is corrected to change "New Hackensack, N. Y." to read "Poughkeepsie, N. Y."

(7) Red Airway No. 17 (Rantoul, Ill., to Baltimore, Md.) - From the Rantoul, (Chanute), Ill., AFB rdo rng stn to the intersection of the NE course of the Rantoul, (Chanute), Ill., AFB rdo rng and the SE course of the Chicago, Ill., rdo rng. From the Ft. Wayne, Ind., rdo rng stn...

(8) Red Airway No. 32 (Laredo, Tex., to Houston, Tex.) - is corrected to change "San Antonio, Tex. (Kelly)" to read "Kelly, Tex.", and to delete "(Alamo)" wherever it appears in the designation.

(9) Red Airway No. 38 (Big Spring, Tex. to San Antonio, Tex.) - is corrected to change "San Antonio, Tex. (Kelly)" to read "Kelly, Tex.", and to delete "(Alamo)" wherever is appears in the designation.

(10) Red Airway No. 42 (Milwaukee to Lafayette, Ind.) . . . The intersection of E course Rockford, Ill., rdo rng and NW course of Chicago, Ill., rdo rng. From the Glenview, Ill. (Navy) rdo rng stn to the intersection of the SW course of the Glenview, Ill., (Navy) rdo rng and the W course of the Chicago, Ill., rdo rng. From the intersection of the SE course of Rockford, Ill., and the W course of Goshen, Ind. . . .

(11) Red Airway No. 61 (Pittsburgh, Pa., to Washington, D. C.) - From the Johnstown, Pa.. non-directional rdo bcn via the intersection of the SE course of the Pittsburgh, Pa., rdo rng and the NW course of the Arcola, Va., rdo rng; the Arcola, Va., rdo rng stn to the intersection of the SE course of the Arcola, Va., rdo rng and the SW course of the Washington, D. C., rdo rng.

(12) Red Airway No. 62 (Lansing, Mich., to Altoona, Pa.) - . . . The intersection of SE Cleveland, Ohio and W Pittsburgh, Pa. From the intersection of the SE course of the Pittsburgh, Pa., rdo rng and the NE course of the Morgantown, W. Va., rdo rng via the Johnstown, Pa., non-directional rdo bcn to the Altoona, Pa., rdo rng stn.

(13) Red Airway No. 77 (Lynchburg, Va., to Millville, N. J.) - From the Lynchburg, Va., rdo rng stn via the Richmond, Va., rdo rng stn; Tappahannock, Va., rdo rng stn to the Millville, N. J., rdo rng stn, excluding that portion below 6000' which lies over danger areas.

(14) Red Airway No. 87 (Hawaiian Islands), is added to read: - From the intersection of the NW course of the Port Allen, T. H., rdo rng and a point 100 miles NW of the Port Allen, T. H., rdo rng stn via the Port Allen, T. H., rdo rng station to the intersection of the SE course of the Port Allen, T. H., rdo rng and the SW course of the Honolulu, T. H., rdo rng. From the Honolulu, T. H., rdo rng stn via the Maui, T. H., rdo rng stn to the intersection of the SE course course of the Maui, T. H., rdo rng and the N course of the Hilo, T. H., rdo rng. From the Hilo, T. H., rdo rng stn to the intersection of the E course of the Hilo, T H., rdo rng and a point 100 miles E of the Hilo, T. H., rdo rng stn.

(15) Blue Airway No. 18 (Philadelphia, Pa., to Burlington, Vt.) - is corrected to change "New Hackensack, N. Y." to read "Poughkeepsie, N. Y."

(16) Blue Airway No. 23 (Detroit, Mich., to Flint, Mich.) - From the intersection of the N course of the Detroit, Mich., rdo rng and the E course of the Lansing, Mich., rdo rng to the Flint, Mich., non-directional rdo bcn.

(17) Blue Airway No. 30 (Brownsville, Tex., to Amarillo, Tex.) - is corrected to change "San Antonio, Tex. (Kelly)" to read "Kelly, Tex."

(18) Blue Airway No. 34 (Terre Haute, Ind., to Peoria, Ill.) - is added to read : From the the intersection of the N course of the Terre Haute, Ind., rdo rng and the SE course of the Rantoul (Chanute), Ill., AFB rdo rng via the Rantoul (Chanute), Ill., AFB rdo rng stn to the intersection of the NW course of the Rantoul (Chanute), Ill., AFB rdo rng and the SW course of the Joliet, Ill., rdo rng.

(19) Blue Airway No. 41 (New York, N Y., to United States-Canadian Border). . . Hartford, Conn., rdo rng stn; the intersection of the NW course of the Hartford, Conn., rdo rng and the S course of the Westfield, Mass., rdo rng; Westfield, Mass., rdo rng stn; intersection of the N course of the Westfield, Mass., rdo rng and the SW course of the Concord, Mass., rdo rng; Concord, Mass., rdo rng stn to Portland, Maine, rdo rng stn . . .

(20) Blue Airway No. 42 (Kokomo, Ind., to Grand Rapids, Mich.) - From the intersection of the S course of the Goshen, Ind., rdo rng and the SW course of the Ft. Wayne, Ind., rdo rng to the Goshen, Ind., rdo rng stn. From the intersection of the E course of the South Bend, Ind., rdo rng and the S course of the Battle Creek, Mich., rdo rng via the Battle Creek, Mich., rdo rng stn; the intersection of the N course of the Battle Creek, Mich., rdo rng and the SE course of the Grand Rapids, Mich., rdo rng to the Grand Rapids, Mich., rdo rng stn.

(21) Blue Airway No. 44 (Advance, Mo., to U. S.- Canadian Border). . From the Indianapolis, Ind.. rdo rng stn via the intersection of the S course of the Goshen, Ind., rdo rng and the SW course of the Fort Wayne, Ind., rdo rng; Fort Wayne, Ind., rdo rng stn . . .

(22) Blue Airway 48 (New York, N. Y., to Poughkeepsie, N. Y.) - designation corrected to change "New Hackensack, N. Y " to read "Poughkeepsie, N. Y."

CONTROL AREAS: Green Airway No. 9 ctl areas (Hawaiian Islands). - is added to read: All of Green civil airway No. 9.

(2) Amber Airway No. 1 ctl areas (U. S- Mexican Border to Nome, Alaska) - Those portions of Amber civil airway No. 1 within the limits of the continental U. S. From the intersection of the SE course of the Sitka, Alaska, rdo rng and the U. S.- Canadian Border to a line extended at right angles across such airway through a point 25 miles NW of the Skwentna, Alaska, rdo rng stn.

(3) Amber Airway No. 10 ctl areas (Hawaiian Islands). - is added to read: All of Amber civil airway No. 10

(4) Amber Airway No. 11 ctl areas (Hawaiian Islands). - is added to read: All of Amber civil airway No. 11

(5) Amber Airway No. 12 ctl areas (Hawaiian Islands). - is added to read: All of Amber civil airway No. 12

(6) Red Airway No. 17 ctl areas (Rantoul, Ill., to Baltimore, Md.). CAPTION CHANGE

(7) Red Airway No. 40 ctl areas (Shemya, Alaska, to Anchorage, Alaska.) - From the

Port Heiden, Alaska, rdo rng stn to the Anchorage (Merrill), Alaska, rdo rng stn.

(8) Red Airway No. 62 ctl areas (Lansing, Mich., to Altoona, Pa.). CAPTION CHANGE.

(9) Red Airway No. 77 ctl areas (Lynchburg, Va., to Millville, N. J.) CAPTION CHANGE.

(10) Red Airway No. 87 ctl areas (Hawaiian Islands). is added to read: All of Red civil airway No. 87.

(11) Blue Airway No. 26 ctl areas (Anchorage, Alaska to Nenana, Alaska).-All of Blue Airway No. 26.

(12) Blue Airway No. 27 ctl areas (Kodiak, Alaska to Kotzebue, Alaska) - From the intersection of the W course of the Kodiak, Alaska, rdo rng and the SE course of the Naknek, Alaska, rdo rng to a line extended at right angles across such airway through a point 50 miles NW of the Naknek, Alaska, rdo rng stn.

(13) Blue Airway No 32 ctl areas (Pendleton, Oreg., to Fairbanks, Alaska). - All of Blue civil airway No. 32.

(14) Blue Airway No. 34 ctl areas (Terre Haute, Ind., to Peoria, Ill.)-is added to read: All of Blue civil airway No. 34.

(15) Blue Airway No. 42 ctl areas (Kokomo, Ind., to Grand Rapids, Mich).- -CAPTION CHANGE.

(16) Blue Airway No. 48 ctl areas (New York, N. Y. to Poughkeepsie, N. Y.)· CAPTION CHANGE.

CONTROL AREA EXTENSIONS:

(1) Charlotte, N. C. - From the Charlotte, N. C., rdo rng stn extending 5 miles either side of the S course of the rdo rng to a point 20 miles S of the rdo rng stn, and from the ILS localizer extending 5 miles either side of the ILS localizer course to a point 30 miles SW of the ILS localizer.

(2) Red Bluff, Calif. - Is added to read: From the Red Bluff, Calif., rdo rng stn extending 5 miles either side of the E course of the rdo rng to a point 25 miles E of the rdo rng stn, and extending 5 miles either side of the W course of the rdo rng to a point 25 miles W of the rdo rng stn.

(3). Houston, Tex. - Is added to read: All that area within a 25 mile radius of the Houston, Tex., rdo rng stn located in the N quadrant bounded by the western limits of Blue civil airway No. 13 and the eastern limits of Blue civil airway No. 5.

Burbank, Calif. -From the Burbank, Calif., rdo rng stn extending 5 miles either side of the SW crs of the Burbank, Calif., rdo rng to the intsxn of the SW crs of the Burbank, Calif., rdo rng and the W crs of the Los Angeles, Calif., VHF rdo rng, and all that area bounded on the S by the northern limits of Green Airway No. 5, on the W by the eastern limits of Green Airway No. 4, on the E by the western limits of Amber Airway No. 2 and on the N by a line 5 miles N of and parallel to the center line of the on crs signal of the SE crs of the Burbank, Calif., rdo rng from the eastern limits of Green Airway No. 4 to the western limits of Amber Airway No. 2.

(4) Rantoul, Ill. - Is added to read: Within a 25 mile radius of the Rantout (Chanute), Ill., AFB rdo rng stn.

(5) Grand Rapids, Mich. - Is revoked.

(6) Casper, Wyo. -Is added to read from the Casper, Wyo., rdo rng stn extending 5 mi either side of the W crs of the rdo rng to a point 25 mi W of the rdo rng stn.

(7) New York, N. Y. - At end of present oceanic control area extension New York, N. Y. ADD excluding that area below 2000' between the intsxn of the E crs of the New York, N. Y. (La Guardia), rdo rng and the SW crs of the Providence, Rhode I., rdo rng to the Nantucket, Mass., VHF rdo rng stn.

CONTROL ZONES: - 3 mile radius control zones:
ADD: Monterey, Calif.: Monterey Peninsula Airport
DELETE: Spokane, Wash.: Felts Field.
5 mile radius control zones:
ADD: Lafayette, La.: Municipal Airport
Summit, Alaska: Summit Airport
Anchorage, Alaska: Merrill Field
DELETE: Anchorage, Alaska: Municipal Airport.

(1) Casper, Wyo. - Within a 5 mile radius of the Casper AFB extending E 2 miles either side of the W and E crs of the Casper rdo rng to the Parkerton fan marker.

(2) Charlotte, N.C. -Within a 5 mile radius of Douglas Airport extending 2 miles either side of the S crs of the Charlotte, N. C., rdo rng to the Fort Mill fan marker.

(3) Yakataga, Alaska, -Is added to read: Within a 5 mile radius of the Yakataga Arpt extending 2 miles either side of the S crs of the Yakataga rdo rng to Amber Airway No. 1

(4) Honolulu, T. H. - Is added to read: Within a 5 mile radius of the Honolulu Airport extending 2 miles either side of the SW crs of the Honolulu rdo rng to a point 10 miles SW of the rdo rng stn.

REPORTING POINTS:

(1) Green Airway No. 4 (Los Angeles, Calif., to Philadelphia, Pa.) . . . Columbus, O. rdo rng stn; the intsxn of the E crs of the Columbus, O. rdo rng and a track 360° mag from the Zanesville, O. non-directional rdo bcn; the intersection of the W crs of the Pittsburgh, Pa. rdo rng and the NW crs of the Morgantown, W. Va., rdo rng; Pittsburgh, Pa., rdo rng; . . .

(2) Green Airway No. 9 (Hawaiian Islands). -Is added to read: Honolulu, T. H., rdo rng stn.

(3) Amber Airway No. 4 (Brownsville, Tex., to Minot, N. Dak.). - Is corrected to change "San Antonio, Tex, (Kelly) " to read "Kelly, Tex." and to delete word "(Alamo)" wherever it appears in reporting point designation.

(4) Amber Airway No. 10 (Hawaiian Islands). -Is added to read: No reporting point designation.

(5) Amber Airway No. 11 (Hawaiian Islands). -Is added to read: No reporting point designation.

(6) Amber Airway No. 12 (Hawaiian Islands). -Is added to read: Hilo, T.H., rdo rng stn.

(7) Red Airway No. 13 (Sunbury, Pa., to Boston, Mass.) -Is corrected to change "New Hackensack, N. Y." to read "Poughkeepsie, N. Y."

(8) Red Airway No. 17 (Rantoul, Ill., to Baltimore, Md.). - CAPTION CHANGE

(9) Red Airway No. 23 (United States-Canadian Border to New York, N. Y.). - Is corrected to change "New Hackensack, N. Y." to read "Poughkeepsie, N. Y."

(10) Red Airway No. 32 (Laredo, Tex., to Houston, Tex.). - Kelly, Tex., rdo rng stn.

(11) Red Airway No. 38 (Big Spring, Tex., to San Antonio, Tex.). - Is corrected to change "San Antonio, Tex. (Kelly)" to read "Kelly, Tex." and to delete word "(Alamo)" wherever it appears.

(12) Red Airway No. 62 (Lansing, Mich., to Altoona, Pa.) -CAPTION CHANGE.

(13) Red Airway No. 77 (Lynchburg, Va., to Millville, N. J.). -CAPTION CHANGE.

(14) Red Airway No. 87 (Hawaiian Islands). -Is added to read Port Allen, T. H., rdo rng stn; Maui, T. H., rdo rng stn.

(15) Blue Airway No. 34 (Terre Haute, Ind., to Peoria, Ill.). -Is added to read no reporting point designation.

(16) Blue Airway No. 42 (Kokomo, Ind., to Grand Rapids, Mich.). -CAPTION CHANGE.

(17) Blue Airway No. 47 (Martinsburg, W. VA., to Philipsburg, Pa.).-The intsxn of the S crs of the Altoona, Pa., rdo rng and the NW crs of the Washington, D. C. rdo rng.

(18) Blue Airway No. 48 (New York, N. Y., to Poughkeepsie, N.Y.). -CAPTION CHANGE.

THE PILOT WEATHER REPORTING PROGRAM

New joint procedures for the handling of pilot reports of weather conditions observed in flight have been developed by the Weather Bureau and the Civil Aeronautics Administration.

Pilot reports of weather conditions are especially needed to help fill in the gaps in the present weather observing network. The weather observer on the ground often needs the help of pilots to determine weather conditions aloft. All pilots can help by promptly reporting unexpected or hazardous weather conditions observed in flight to the nearest CAA Communications Station by radio or to the nearest Weather Bureau Office upon landing.

Pilot weather reports now receive wide distribution. Some of the uses made of the reports are indicated below:

THE AIRPORT TRAFFIC CONTROL TOWER uses the reports to expedite the flow of air traffic in the vicinity of the field and also forwards reports to other interested offices.

THE CAA AIRWAYS COMMUNICATIONS STATION broadcasts the reports so that other airmen may benefit from them.

THE LOCAL WEATHER BUREAU OFFICE uses the reports in briefing other pilots and in forecasting.

THE CAA AIR ROUTE TRAFFIC CONTROL CENTER uses the reports to expedite the flow of air traffic over the civil airways and to determine most favorable flight altitudes.

THE WEATHER BUREAU FLIGHT ADVISORY WEATHER SERVICE finds pilot reports very helpful in issuing advisories of hazardous weather conditions to aircraft in flight. This office also uses the reports to brief other pilots, and in forecasting.

THE AIRLINE RADIO STATION makes reports available to flight dispatchers and airline meteorologists.

AIRMAN'S GUIDE

SPECIAL NOTICE

YOUR VFR FLIGHT PLAN IS TRANSMITTED - Before taking off on a VFR cross-country, advise your destination airport you are coming by filing a flight plan with the nearest CAA Airway Communications Station. This station will transmit the flight plan to the communications station at your destination.

When you change your destination enroute, always notify the original destination point as soon as you land.

You can file the flight plan in person, by telephone, or by radio. Because of radio congestion, however, the CAA requests that you normally file in person or by telephone.

The CAA offers this VFR flight plan transmission service primarily to promote safety by continually and accurately accounting for your aircraft. Thus, if you have two-way radio, you may report to each communications station over which you pass, in addition to advising the communications station at your destination of your arrival.

If you have filed a flight plan, immediately notify the nearest CAA Airway Communications Station when you land. If you don't, an unwarranted and expensive search and rescue procedure will be inaugurated. So, while the CAA encourages you to file a flight plan, you should assure the flight plan service's effectiveness by being sure to close your flight plan after landing.

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS AIR FORCE AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Air Force towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's, <
OMK's are at the same locations as the middle and outer markers unless otherwise specified. ➔New or revised data. + =additional data will be found in Notices To (1-31-50)
Airmen section

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met.

NOTE: Category II indicates by parenthetical (2). Category III= Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE; Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . .Approach Control Tower, CAA
B . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . .Control Tower, CAA
CA . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN . . . .Control Tower, Navy
D . . . .Distantly controlled
FM . . .VHF fan marker (100 watts)
GCA . . .Ground Controlled approach system
H . . . . .Non-directional radio beacon (homing), power 50 watts or more
ILS . . .Instrument Landing System (voice on localizer channel)
IM . . . .VHF boundary marker
L . . . . .L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . .VHF fan marker, low powered (5 watts, not over 10 miles from range
MH . . .Non-directional radio beacon (homing) power less than 50 watts
ML . . .Range (loop radiators), power less than 50 watts
MM . . .VHF middle marker
MMK . .Compass locator station when combined with middle marker of ILS.
MOR . . .Low frequency omni-directional range.
MRA . . .Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . .Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . .VHF outer marker
OMK . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . .Point-to-Point radio
RA . . .Range (adcock, vertical radiators), power 150 watts or more.
RL . . .Range (loop radiators), power 150 watts or more.
S . . . .Simultaneous (range signals and voice) type of transmitter.
T . . . .Teletype
TX . . .Principal teletype
V . . . .Additional VHF voice feature on other than range frequency.
VAR . . .Visual-aural VHF range
VOR . . .Visual omni-directional VHF range
W . . . .Without voice facilities
Z . . . .VHF station location marker at a range station

FREQUENCY LEGEND

\# = Guards same VHF frequencies station transmits
(1) = 3105, 4495 kc Guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105, 4495, 3117.5 kc; 122.1, 126.7, 140.58 mc. This group of frequencies is group generally guarded by INSACS.
NOTE: (3) -3117.5 kc = guards every frequency in (3) except 3117.5 kc.
(3) ,6210 kc = guards every frequency in group (3) plus 6210 kc.

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all C.A.A. INSACS April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. Range courses are magnetic in-bearings.

✓ New facilities or name changes, see page XIX.
\+ Additional data will be found in Notices to Airmen Section.
